This book reflects the results of the 2nd and 3rd International Workshops on Turbulent Spray Combustion. The focus is on progress in experiments and numerical simulations for two-phase flows, with emphasis on spray combustion. Knowledge of the dominant phenomena and their interactions allows development of predictive models and their use in combustor and gas turbine design. Experts and young researchers present the state-of-the-art results, report on the latest developments and exchange ideas in the areas of experiments, modelling and simulation of reactive multiphase flows. The first chapter reflects on flame structure, auto-ignition and atomization with reference to well-characterized burners, to be implemented by modellers with relative ease. The second chapter presents an overview of first simulation results on target test cases, developed at the occasion of the 1st International Workshop on Turbulent Spray Combustion. In the third chapter, evaporation rate modelling aspects are covered, while the fourth chapter deals with evaporation effects in the context of flamelet models. In chapter five, LES simulation results are discussed for variable fuel and mass loading. The final chapter discusses PDF modelling of turbulent spray combustion. In short, the contributions in this book are highly valuable for the research community in this field, providing in-depth insight into some of the many aspects of dilute turbulent spray combustion.

A one-year devotional calendar meant for mothers and daughters to connect to each other and to God.

Pain 2 Passion is a very powerful movement of women warriors who decided to put their stories in this compilation. Co-Compiled by Nakisa King and DeAnna Bookert, Pain 2 Passion is truly one of those books you want to have with you always. Stories from women who have never spoken before about abuse, abandonment and shame. Compilations allow for stories to come forth in a group and #p2p was birthed from the agreement of several women to take part in a very special movement.

Annotation "There is no one writing about Business Continuity today who is better informed and clearer thinking than Andrew Hiles. In this 3rd edition he provides an up-to-the-minute review, including the latest thinking about Standards as well as valuable insights on how legislation and regulation might impact BCM practitioners. The chapters on Risk Evaluation and Emergency Response form an impressive body of knowledge about those areas that surpass many specialist publications on those topics. Andrew was instrumental in the formation of the Business Continuity Institute and is certainly one of our most celebrated members. In recent years his writings have given great leadership to our profession and even convinced many students to think of BCM as a valuable and credible long-term career option."--Lyndon Bird, FBCI, Technical Director, The Business Continuity Institute. You don't have to depend on trial and error - you can rely on Andrew Hiles. After consulting for 35 years in 60 countries, Hiles has just about seen it all when it comes to BC practices - the good, the bad, and the ugly. In this completely revamped 3rd edition of his classic book, Hiles shares a wealth of hard-won tips and tools about what works and why. The book includes case studies, self-test questions, checklists, forms, charts, and sample questionnaires. An accompanying Free Download contains editable models, templates, and spreadsheets for risk and impact assessments; calculations of customer lifetime value, true cost of disaster, productivity and sales losses. He even provides a much requested job description for a BC Coordinator! It's all wrapped up in a prize package of practical tips and tools designed to spare you costly mistakes. This is your chance to create a BCM system based on the best global expertise currently available - and conveniently all in one place! Andrew Hiles, FBCI, was founding director and first Fellow of the Business Continuity Institute. For 35 years he's traveled to 60 countries, consulting to major private and government organizations, training the next generation of BC practitioners. Learn how to develop a BCP from scratch, or improve the one you have, using Hiles' global perspectives, which include case studies, global standards, and hard-won insights into what works and why.

A new form of accounting statement--the value-added statement--is gaining popularity in the United Kingdom, and could easily be adopted in the United States, with beneficial results. Riahi-Belkaoui maintains that the value-added statement can be viewed as a modified income statement: it reports the operating performance of a company at a given point in time, using both accrual and matching procedures. Unlike the income statement, however, the VAS is interpreted not as a return to shareholders but as a return to the larger group of capital and labor providers. Belkaoui spells out how the statement is developed, how it can be adapted to U.S. needs, and what its potential benefits would be. His book will thus interest not only accountants, teachers, and students who follow trends in international and multi-national accounting, but also those who want to prepare for the development of techniques and procedures that might be anticipated in the U.S.

It's Christmas and the Reeds have big plans. Stop by to see what secrets they're sharing!

Are you looking to learn how to use and get the most out of your new Samsung Galaxy S4 smartphone? If so, you've come to the right place! In this book, I'll show you EVERYTHING you need to know about your new Samsung Galaxy S4 as well as some awesome tips and tricks to make the most of this

amazing device! Here are just a few of the dozens of things you'll learn in this Samsung Galaxy S4 manual: - Optimizing Your Settings - Setting Up Gestures - Protecting Your Galaxy from Invasion - Setting Up Wi-Fi - Exclusive S4 Features - Preserving Battery Power ...and LOTS more! In addition, this Samsung Galaxy S4 guide contains many helpful screenshots to help you follow along and walk you through the steps to get everything set up! What makes this Samsung Galaxy S4 manual unique is that we make it easy for you to follow along even if you aren't very technology savvy! Take the first step towards getting the most out of your new Samsung Galaxy S4 and click on the "buy now" button above!

A collection of original contributions by researchers who work at the forefront of a new field, lying at the intersection of computer vision and computer graphics. Several original approaches are presented to the integration of computer vision and graphics techniques to aid in the realistic modelling of objects and scenes, interactive computer graphics, augmented reality, and virtual studios. Numerous applications are also discussed, including urban and archaeological site modelling, modelling dressed humans, medical visualisation, figure and facial animation, real-time 3D teleimmersion telecollaboration, augmented reality as a new user interface concept, and augmented reality in the understanding of underwater scenes.

When they move to California after their missionary father is killed in South America, Rebecca must deal with the threats of a group of satanists while her younger brother Scott faces temptation at the hands of a beautiful classmate.

Become a master, not a victim, of change! “Change” doesn’t have to be a bad word. Our lives are like objects hurtling through time, colliding with changing circumstances or situations that send us careening down new trajectories and new paths. But if we learn how to respond, change can send us to a bigger and brighter life. Change Your Trajectory will help you to be proactive in responding to a rapidly and constantly changing world. Its principles will help you transition through change, whether it’s an occupational change, relationship change, political change, sociological change, technological change, or economic change. This book is for anyone who is experiencing stagnation in life, anyone who is unfulfilled in their current juncture in life, anyone who is simply hungry for change, or anyone who wants to avoid growing obsolete. You will learn: How to navigate through uncertainty How to deal with change and transition How to experience a new trajectory How to develop a vision for the future How to be a master of change How to improve your thinking How to overcome failures It is time to make the rest of your life better!
