Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America ' s premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede ' s wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid ' s, handle like a pro ' s. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension ' s condition. He outlines testing procedures that will help you gauge how well you ' re improving your suspension, along with your riding. And, if you ' re inclined to perfect your bike ' s handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

OUR CULTURE HAS BECOME OBSESSED WITH HUSTLING. As we struggle to keep up in a knowledge economy that never sleeps, we arm ourselves with life hacks, to-do lists, and an inbox-zero mentality, grasping at anything that will help us work faster, push harder, and produce more. There ' s just one problem: most of these solutions are making things worse. Creativity isn ' t produced on an assembly line, and endless hustle is ruining our mental and physical health while subtracting from our creative performance. Productivity and Creativity are not compatible; we are stuck between them, and like the opposite poles of a magnet, they are tearing us apart. When we ' re told to sleep more, meditate, and slow down, we nod our heads in agreement, yet seem incapable of applying this advice in our own lives. Why do we act against our creative best interests? WE HAVE FORGOTTEN HOW TO FLOAT. The answer lies in our history, culture, and biology. Instead of focusing on how we work, we must understand why we work—why we believe that what we do determines who we are. Hustle and Float explores how our work culture creates contradictions between what we think we want and what we actually need, and points the way to a more humane, more sustainable, and, yes, more creative, way of working and living.

This Manual will cover the JCB Backhoe Loader - the iconic 'yellow' digger, variants of which have now been in production for over 50 years. The book will be produced with the full co-operation of JCB, who are likely to take approx 2,000 copies to use for promotional activity to celebrate the company's 70th anniversary in October 2015 (a year of celebrations is planed running until October 2016). JCB has an extensive archive from which material will be drawn for use in the book, and it is envisaged that the 'project vehicle' will be a 'classic' 1979 3C Backhoe Loader - revered by enthusiasts, and the machine that took JCB from leading British manufacturer to a global player.

This is one in a series of manuals for car or motorcycle owners. Each book provides information on routine maintenance and servicing, with tasks described and photographed in a step-by-step sequence so that even a novice can do the work.

Classic Honda Motorcycles presents an overview of Honda motorcycles produced from 1958 through 1990, including iconic models such as the CB77 Super Hawk, CB92 Benly, Dream, CB750 and many others. Enthusiasts will find a bounty of useful and interesting information about which bikes are likely to suit an individual rider's needs, which models are most collectible and how to find parts for rare Honda motorcycles.
