### Back to school

The answer might not be as simple as you think. Imagine I showed you a list of words one by one on a computer screen and...

...

This book investigates the localised effects of reform by exploring the impact of a school improvement policy agenda on the work of three experienced principals. It presents three longitudinal case studies within a shared specific leadership context in Queensland, Australia. The case studies enable an exploration of the way the principalship in this context has evolved over time, providing deep insights into the practices and beliefs of three experienced school leaders working in a period of rapid and urgent systemic reform. The nature of global reform policy borrowing means that the research and the findings within this monograph are relevant for international audiences. The book describes a new way to understand and theorise the effects of reform policies and associated pressures on school leaders. Using post-structural theory, it provides a better understanding of the specific effects of reform policy ensembles, particularly when combined with an analysis of the ways policy and discourse work together at a wider level to create an environment that disciplines the principalship. Further, it sheds lights on the means of complying with or contesting policy influences and how the work of leaders has changed over time.

This book provides, for Australia, an independent analysis of major issues facing its educational evaluation and assessment framework, current policy initiatives, and possible future approaches.

Theory and practice of school leadership from distinguished scholars and practitioners from around the world.

The book is a collective investigation of the structuring of theses in education, the social sciences and other disciplines that commonly do not follow the standard procedures of the scientific method. To help research students design a structure for their own thesis and liberate their investigations from the constraints associated with the use of the conventional structure, it explains how the structures adopted were designed to suit the topic, methodology and paradigm. It also provides a wide range of examples to draw upon, which suit a broad spectrum of theory, methodological approaches, research methods and paradigms. Additionally, by analyzing the methodologies and paradigms, and reviewing the methodological and paradigmatic spectrum, it offers a significant contribution to the way research is conceptualized. The book addresses a number of key questions faced by students, supervisors and examiners: • Why do examiners often find it difficult to read work in non-scientific disciplines when theses are structured in accordance with the conventional scientific method? • Why do students in non-scientific disciplines struggle to write up the outcomes of their research in the conventional structure? • What alternative thesis structures can be devised to better suit the wide range of methods? • Which theories and paradigms are commonly followed in education and the social sciences and how do these perspectives influence the research process? • What methods, theories and paradigms are commonly adopted by education and social science students and what problems do these pose when students write their theses?

This book is designed for parents who want to help their children and for teachers who wish to prepare their class for the NAPLAN Tests. NAPLAN Tests are sat by Year 5 students Australia-wide. These tests are held in May every year. The tests are in Literacy and Numeracy.

Essential reading for any parent wanting to help their child develop the emotional skills necessary for school success! Starting school can be an anxious time for both children and parents! Studies increasingly show that children who have good emotional skills are far better equipped to meet any challenges and develop resilience in the face of any setbacks. And it's parents and carers who are the key people in helping children to develop these strong emotional foundations. By focusing on your child's emotional and social needs, School Start enables you to understand your child's brain development and how this impacts on their emotional intelligence. It also offers practical strategies for how you can help your child to: deal with anxiety initiate new friendships cope when things don't always go to plan accept that people have different strengths and weaknesses and that they won't always be 'the best' (or 'the worst') at things deal with teasing and bullying, and develop resilience. Guidance is also given to help you cope with your own reactions to your child starting school. It's important for new 'school parents' to be self-aware and in touch with their parenting values, as it's all too easy to draw on 'baggage' from your own school years when faced with problems your child might face. With School Start to help you, you'll be well equipped to offer the right advice and be the emotional support your child needs—no matter what they encounter!

Excel Year 6 NAPLAN\*-style Tests includes: five practice tests each for numeracy, language conventions and reading; six practice tests for writing plus model answers at basic, intermediate and advanced levels; detailed answers with explanations for all twenty-one practice tests; the best test preparation for your child.
