Supplement to "A Monograph of Clavaria and allied Genera ...

Clavaria is a genus of fungi in the family Clavariaceae. Species of Clavaria produce basidiocarps (fruit bodies) that are either cylindrical to club-shaped or branched and coral-like. They are often grouped with similar-looking species from other genera, when they are collectively known as the clavarioid fungi.

Clavaria - Wikipedia

In his monograph of the Sapotaceae (1904), however, he includes Sideroxylon grandiflorum (= C. major) and gives Mauritius as its locality, but does not refer to Gaertner's two other species. He includes one other species with S. grandiflorum in his section Calvaria of the genus Sideroxylon, namely S. imbricarioides A.DC., the 'Bois de fer' from

The Genus Calvaria, with an Account of the Stony Endocarp ...

THE CLAVARIACEAE OF INDIA--XII* BY K. S. THIND F.A.SC. AND S. S. RATTAN (Botany Department, Panjab University, Chandigarh) Received June 23, 1971

This 10th edition, of the acclaimed reference work, has more than 21,000 entries, and provides the most complete listing available of generic names of fungi, their families and orders, their attributes and descriptive terms. For each genus, the authority, the date of publication, status, systematic position, number of accepted species, distribution, and key references are given. Diagnoses of families and details of orders and higher categories are included for all groups of fungi. In addition, there are biographic notes, information on well-known metabolites and mycotoxins, and concise accounts of almost all pure and applied aspects of the subject (including citations of important literature). Co-published by: Commonwealth Scientific and Industrial Research Organisation (CSIRO)
