This major update to his award-winning, record-breaking book does something for digital photographers that's never been done before—it cuts through the bull and shows you exactly "how to do it." The step-by-step setup for getting what comes out of your printer to match exactly what you see onscreen. A whole chapter on how to process HDR (High Dynamic Range) images using CS5's new Merge to HDR Pro. How to master CS5's new Content-Aware Fill. How to color correct any photo without breaking a sweat. How to process RAW images like a pro (plus how to take advantage of all the new Camera Raw features in CS5!).
