Note that some of the “free” ebooks listed on Centsless Books are only free if you’re part of Kindle Unlimited, which Page 1/3

Frequently reissued with the same ISBN, but with slightly differing bibliographical details.

Female scientists, technologists, engineers, and mathematicians worldwide are making historic contributions to their fields. The modern workforce is closer to gender-equal than it has ever been, and many efforts are in place to support further progress. The Internet of Women provides an exciting look at personal narratives and case studies of female leaders and cultural shifts around the globe that illustrate this promising trend. From the United Nations' emphasis on girls and technology education in the SDGs (Sustainable Development Goals) to the increased female labor force in Zambia, a policy change that was inspired by the MDGs (UN Millennial Development Goals), The Internet of Women captures stunning examples of progress from around the world and men working hand in hand with women advocating for cultural change. Scholars and practitioners lament the lack of women leading and working in leading organizations in the technology industry. Gender equality and female participation in the tech field is critical to both developing and developed economies; nevertheless, this gap remains a global phenomenon. The lack of female leadership is particularly extreme at the highest echelons of leading technology organizations. Few publicly traded tech companies have female CEOs - in fact, most nations have zero female leadership in the tech industry. This gap indicates a slow pace of progress for gender equality in tech employment. Women's pay still lags nearly a decade behind, according to the World Economic Forum, meaning that women's on average pay today is the equivalent to that of similarly qualified and similarly employed men in 2006. Without significant progress, the current rate of change will not lead to parity for 118 years, according to the World Economic Forum (WEF). However there's significant work being done to shift this tide. Take for instance Michelle Lee, the first female Under Secretary of Commerce for Intellectual Property and Director of the United States Patent and Trademark Office (USPTO), reflects on her childhood Girl Scout badge in sewing and cooking and how that memory inspired her to create an IP badge that exposes young women to the process of invention. Social entrepreneur, investor, and Malala Fund co-founder Shiza Shahid shares her efforts beginning from mentoring young women in Pakistan to her current work directing more investment to women innovators around the globe. And Elizabeth Isele, a senior fellow in Social Innovation at Babson College, shares her research on women and ageism saying we need to retire the word retirement. The book is divided into six parts, each with unique areas of focus: \* Millennials Leading: Exploring Challenges and Opportunities Facing the Next Generation of Women in Technology \* Men and Women Empowering One Another \* Bold Leadership: Women Changing the Culture of Investment and Entrepreneurship \* Educating for the 21st Century \* Breaking the Glass Ceiling: A Generation of Women Forging into Technology Leadership \* Emerging Fields of Technology The Internet of Women gathers examples about the increasingly inclusive and progressive gender culture in technology from over 30 countries. Stories range from an entrepreneur in Dubai partnering with private and public sector entities to accelerate blockchain technology to a young British woman moving to Silicon Valley to launch an artificial intelligence platform and incubator. The book is intended for corporations, academic institutions, the private sector, government agencies, gender experts, and the general public, and its key benefit is to let the reader understand a path towards implementing diversity overall globally. It also showcases the strategies, tools, and tactical execution on how to create cultural change in all parts of the world.

Covers the Cambridge IGCSE syllabus (0455) and the Cambridge O Level syllabus (2281), first examination from 2020. This series helps students understand economic theory, terminology and principles. By applying tools of economic analysis, undertaking calculations and writing longer responses, students learn how to look at the world like an economist. The workbook matches the Cambridge IGCSE and O Level Economics syllabuses and provides students with additional concepts to strengthen their understanding, as well as the quality of their answers. The answers to the workbook questions are in the teacher's resource.

READING KEYS - the first in a three-book reading series by Laraine Flemming - offers a comprehensive introduction to reading skills and strategies, from using context clues to identifying purpose and bias. Clear, accessible explanations present reading concepts without oversimplifying the process of reading comprehension. To ensure students' understanding, reading keys or summaries follow the explanations, breaking them down into manageable chunks. Throughout each chapter, a variety of steadily more difficult exercises assess students' understanding of the material and promote improved comprehension and critical-thinking skills. This incremental approach to instruction and assessment makes it easier for beginning readers to absorb and master new information. The Fourth Edition includes new chapters on analyzing arguments and sentence relationships. In addition, there is a greater emphasis on recognizing and understanding verbal clues to meaning, new discussions on how the brain learns and remembers new information, and several new engaging readings. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

PARENTS & TEACHERS, give your students the chance to: Study God's Word daily for themselves Discover personal applications in the Bible Practice discussing what God is teaching them Consider praying to accept Jesus as Savior Understand that truly following Jesus means changing to be like Him The fill-in-the-blank, circle-the-answer workbook (ISBN 978-0-595-45905-6) makes it easy for kids to find out from God's Word (the Bible) what obeying really means. Obedience experts Abram, Noah and Rebekah show them how. Plus, special "Mind-Changeers" sections help kids think through what God is teaching them personally each day. Here's what others say: "I liked the exciting Bible stories and saw things I'd never seen before as I answered the questions. Those Mind-Changeers really challenged me to consider my own actions." -Madeline Crow Student, Age 9-Cumbrio, England "What an excellent tool to get kids in the Bible daily . talking about what God's teaching them. It even explains what it means to accept Jesus as Savior." -Eric Haven Executive Pastor, Woodside Bible Church-Troy, MI, USA "Our boys really enjoyed the fun, easy format. Scripture printed in the book means less looking up for young students." -Laura Meek Pastor's wife-Chicago, IL, USA "I was surprised to hear my kids reminding each other to live out what they're learning. Terrific summer study!" -Heather Davis Homeschool mom of 5-Southfield, MI, USA

This textbook aims to guide, instruct and inspire the next generation of innovation designers, managers and leaders. Building upon an evidence-based innovation development process, it introduces, explains and provides visual models and case examples of what Business Design is, how it is applied across sectors and organizations, and its impact on decision-making and value creation. Students will read and analyze design-led innovation business cases from across the globe, discover multi-disciplinary strategies (from marketing to anthropology) and practice applying a designer's toolkit to find, frame, and solve business problems in contemporary ways. Throughout the book, students will break down the process of innovation and move from initiation to implementation, engage in iterative feedback loops, and develop concrete plans for personal and professional collaboration and workplace application. For MBA and senior undergraduate students, this book offers a step-by-step and comprehensive reference guide to creative problem framing and solving -- inside and beyond the classroom. It integrates marketing principles and management frameworks, with anthropological and design methods reflecting the diverse and in-demand skills vital to tomorrow's workforce. For instructors, this book offers a way to confidently engage learners in the realm of design practices and strategies relevant to business decision-making. The pedagogical framework, along with a comprehensive suite of techniques and templates, offers both novice and experienced teachers a step-by-step reference guide that facilitates skills development in creative problem framing and solving. Angèle Beausoleil is Assistant Professor of Business Design and Innovation in the Rotman School of Management at the University of Toronto, Canada. She is a 'pracademic' who teaches design methodologies for business innovation and leads research on organizational innovation process design, navigation and management. A former communications designer, senior strategist and innovation lab executive, she applies her extensive industry experience to crafting high impact student-centred learning experiences. At Rotman, Beausoleil is the Academic Director of the Business Design Initiative, an emerging education and research centre focused on design-led innovation leadership. She also teaches human-centred design, innovative leadership and creativity to executives, MBA and Commerce students.
