Carl Abbott, who has taught urban studies and urban planning in five decades, brings together urban studies and literary studies to examine how fictional cities in work by authors as different as E. M. Forster, Isaac Asimov, Kim Stanley Robinson, and China Mi é ville might help us to envision an urban future that is viable and resilient. Imagining Urban Futures is a remarkable treatise on what is best and strongest in urban theory and practice today, as refracted and intensely imagined in science fiction. As the human population grows, we can envision an increasingly urban society. Shifting weather patterns, rising sea levels, reduced access to resources, and a host of other issues will radically impact urban environments, while technology holds out the dream of cities beyond Earth. Abbott delivers a compelling critical discussion of science fiction cities found in literary works, television programs, and films of many eras from Metropolis to Blade Runner and Soylent Green to The Hunger Games, among many others.

In Burning Bright, Scott tells a passionate, colorful tale of love and death, her best yet. Setting her story on the free-port planet of Burning Bright, nexus of trade, politically balanced between the human and Hsai empires in space, and center of virtual reality gaming for all of civilization, Scott weaves a network of intrigue and suspense. When space pilot and ambitious young game developer Quinn Lioe gets shore leave on Burning Bright, determined to play the game at its brilliant center, she becomes enmeshed in the conflict between two great empires, a key figure upon whom the fates of fortune turn. Once again, Scott constructs a brilliantly complex future society and tells a story that involves the mind and the heart. This is science fiction adventure at its classic best.

Boss, a loner, loved to dive into derelict spacecraft adrift in the blackness of space... But one day, she found a ship that would change everything—an ancient Dignity Vessel—and aboard the ship, the mysterious and dangerous Stealth Tech. Now, years after discovering that first ship, Boss has put together a large company that finds Dignity Vessels and finds 'loose' Stealth Technology. Following a hunch, Boss and her team come to investigate the city of Vaycahn, where fourteen archeologists have died exploring the endless caves below the city. Mysterious 'death holes' explode into the city itself for no apparent reason, and Boss believes Stealth Tech is involved. As Boss searches for the answer to the mystery of the death holes, she will uncover the answer to her Dignity Vessel quest as well—and one more thing, something so important that it will change her life—and the universe—forever. From the Trade Paperback edition.

Artificially intelligent cities rise up against humanity in this " excellent novel. It came on me as a surprise, and it knocked me out! " (Harlan Ellison). In a theocratic world far into the future, cities control their own movements and organization. Constantly moving, growing and decaying, taking care of every need their inhabitants might think of, the cities have decided that humans are no longer a necessary part of their architecture, casting them out to wander in the wilderness and eke out a meager subsistence. To the exiled humans, the cities represent a paradisaical Eden, a reminder of all they cannot attain due to their sinful and unworthy natures. But things are beginning to change. People are no longer willing to allow the cities to keep them out, choosing instead to force an entry and plunder at will. The cities are starting to crumble and die because they have no purpose or reason to continue living without citizens. One woman, called mad by some and wise by others, is the only human allowed to inhabit a city. From her lonely and precarious position at the heart of one of the greatest cities ever, she must decide the fate of the relationship between human society and the ancient strongholds of knowledge, while making one last desperate attempt to save the living cities.

The long-awaited sequel to the Hugo award-winning novels Cyteen and Downbelow Station. The direct sequel to Cyteen, Regness continues the story of Ariane Emory, Personal Replicate, the genetic clone of one of the greatest scientists humanity has ever produced, and of her search for the murderer of her progenitor—the original Ariane Emory. Murder, politics, deception, and genetic and psychological manipulation combine against a backdrop of interstellar human factions at odds to confront questions that have remained unanswered for two decades... Who killed the original Ariane Emory? And can her Personal Replicate avoid the same fate?

THEY CALL IT "THE CITY OF A HUNDRED ROWS". The ancient city of Thauburley is a vast, multi-tiered metropolis. The poor live in the City Below and demons are said to dwell in the Upper Heights. Having witnessed a murder in a part of the city he should never have been in, street thief Tom has to run for his life. Down through the vast city he is pursued by sky-borne assassins, sinister Kite Guards, and agents of a darker force intent on destabilising the whole city. His only ally is Kat, a renegade like him, but she has secrets of her own... File Under: Fantasy | Towering City

The stories in 334 revolve loosely around a government housing project at 334 East 11th Street in New York City in the 2020s. The project's inhabitants are universally poor, often jobless, sometimes squalid. Some are happy, others angry, depressed, or just numb. The stories study their hopes and disappointments, and all are deeply introspective.

A murder on the moon sends investigator Gil "The Arm" Hamilton on the trail of the killer while trying to clear the beautiful Naomi Mitchison from the suspect list.

Port Eternity Their names were Lancelot, Elaine, Percivale, Gawain, Mordred, Lynette and Vivien, and they were made people, clone servants who worked aboard The Maid, an anachronistic fantasy of a spaceship. They had no idea of their origins, from those old storytapes of romance, chivalry, heroism and betrayal, until a ripple in the space-time continuum sucked The Maid and her crew into a no-man ' s land from which there could be no return, and they were left alone to face a crisis which their ancient prototypes were never designed to master... Wave Without a Shore Freedom was an isolated planet, off the main spaceways and rarely visited by commercial spacers. It was ' t that Freedom was inhospitable, the problem was that outsiders—tourists and traders—claimed that the streets were crowded with mysterious blue-robed aliens. Native-born humans, however, denied that these aliens existed—until a planetary crisis forced a confrontation between the question of reality and the reality of the question... Voyager in the Night Rafe Murray, his sister Jillian, and Jillian ' s husband Paul Gaines, like many other out-of-luck spacers, had come to newly built Endeavor Station to find their future. Their tiny ship, Lindy, had been salvaged from the junk heap, and fitted to mine ore from the mineral-rich rings which circled Endeavor. But their future proved to be far stranger than any of them imagined, when a " collision " with a huge alien vessel provided them with the oddest first contact experience possible!
