Vertebrates and invertebrates are speculated to have evolved from a common ancestor many million years ago. But today, from an evolutionary perspective, vertebrates are considered to be the most apex forms of life on earth. Their complex anatomy and physiology provide a significant advantage over invertebrates in the natural world. 3.

Note: These study questions are not comprehensive. They are meant to supplement your lecture notes as you review them, and alert you to the ways in which you should be thinking about the material, and formulate questions to test yourself. Exams will **NOT** be limited to the material highlighted in these questions, or their formats, so your lecture notes and handouts should be your primary reference.

Biology Hsa Final Exam Study Guide

Believe it or not, some creatures out there don't have to rely on a backbone or a bony skeleton to get them through life as we do, but today we'll be looking at the animals that do! We and the rest of the organisms out there that use a backbone are called vertebrates, and in the following quiz we'll be testing your knowledge on them and what sets them apart from invertebrates! Good luck!
