Brainwashing: The Science of Thought Control is a 2004 popular science book explaining mind control, which is also known as brainwashing, thought reform and coercive persuasion, by neuroscientist and physiologist Kathleen Taylor. It explains the neurological basis for reasoning and cognition in the brain, and proposes that the self is changeable while describing the physiology of neurological pathways. It reviews case studies including Patty Hearst, the Manson Family, and the mass murder/suicide

**Brainwashing: The Science of Thought Control - Wikipedia**

When you come across a book with the title "Brainwashing: The Science of Thought Control", you expect to open its pages and come across a mixture of conspiracy theory and egotistical mentalism. In fact, this is a book which is probably as far from its perceived title as can possibly be, and arguably for good reason, as the author explains.

**Brainwashing: The Science of Thought Control by Kathleen ...**

But until now, a crucial part of the debate has been missing: that of any serious reference to the science of the human brain. Descriptions of how opinions can be changed, whether by persuasion, deceit, or force, have been almost entirely psychological. In Brainwashing, Kathleen Taylor brings the worlds of neuroscience and social psychology together for the first time.

**Brainwashing: The science of thought control (Oxford ...**

Brainwashing is the concept that the human mind can be altered or controlled by certain psychological techniques. Brainwashing is said to reduce its subjects' ability to think critically or independently, to allow the introduction of new, unwanted thoughts and ideas into their minds, as well as to change their attitudes, values and beliefs. The term "brainwashing" was first used in English by Edward Hunter in 1950 to describe how the Chinese government appeared to make people cooperate with them
