There are lots of books about the classic BMW Boxers; their history, performance, lineage, and the minutiae of its specification. But none of them concentrate entirely on telling you what to look for when buying one secondhand. That's what this book is about - it is a straightforward, practical guide to buying a used Boxer twin. It doesn't list all the correct colour combinations for each year or analyse the bike's design philosophy - there are excellent books listed at the end of this one that do all of that - but it will help you avoid buying a dud. Point by point, it takes the reader through everything that needs looking at when buying a Boxer, plus spares prices, which is the best model to buy for your needs, and a look at auctions, restorations and paperwork The last of the 'classic' air-cooled Boxer twins, these bikes are now collector's items, and many have been saved, restored and continue to be ridden - this book tells the reader how to be part of the Boxer's ongoing story.

The Death Star is a spherical space station, the size of a small moon, highly armoured and armed to destroy anything from enemy spaceships to whole planets. Using cutaway drawings, exploded diagrams and photographs, backed by detailed technical specifications and descriptions of the onboard systems, this owner's manual reveals the technology contained within and lays bare the awesome power (and weaknesses) of the Empire's ultimate weapon.
