Calvin And Hobbes Embodied the Voice of the Lonely Child. So many people loved the comic strip Calvin and Hobbes because they related to the small child who lived out his fantasies with his ever-loyal stuffed tiger Hobbes. Of course, Calvin was much more clever than we were at that age. According to Libby Hill, Calvin's fantasy world was a retreat from the real world he didn't fit into.

Calvin And Hobbes embodied the voice of the lonely child Calvin didn't have trouble focusing on the world around him, he had trouble reconciling himself to the fact that the world around him was such a disappointment. The reason the strip appealed to people both young and old is because Calvin was feeling underwhelmed at a college graduate level. It's not unheard of for children to ...

Like Peanuts, Calvin And Hobbes is timeless for the exact same reason: It appealed to adults just as much as it appealed to children. It spoke of things not always acknowledged in polite company, how people are mean, how we wish we had more friends, how being grown up seems weird and being a child even weirder, how the world doesn't make sense, and how it's hard to believe in things even though we desperately want to believe in them.

The Embodied Playbook discovers a new approach to understanding student literacy in a surprising place: the university athletics department. Through analysis of a yearlong case study of the men's basketball team at the University of North Georgia, J. Michael Rifenburg shows that a deeper and more

refined understanding of how humans learn through physical action can help writing instructors reach a greater range of students. Drawing from research on embodiment theory, the nature and function of background knowledge, jazz improvisation, and other unexpected domains, *The Embodied Playbook* examines a valuable but unexplored form of literacy: the form used by student-athletes when learning and using scripted plays. All students' extracurricular prior knowledge is vital for the work they undertake in the classroom, and student-athletes understand the strengths and constraints of written text much as they understand the text of game plays: through embodying text and performing it in a competitive space. The book focuses on three questions: What are plays and what do they do? How do student-athletes learn plays? How can teachers of composition and rhetoric better connect with student-athletes? *The Embodied Playbook* reveals the literacy of the body as a rich and untapped resource for writing instruction. Given the numbers of students who are involved in athletics, whether intramural, community-related, or extracurricular, Rifenburg's conclusions hold important implications not only for how we define literacy but also for how writing programs can serve all of their students most effectively.

Given the fierce urgency of now, this important book confronts and addresses key problems and questions of political theology with the aim of proposing a radical political theology for the Anthropocene Age. LaMothe invites readers to think and be otherwise in living lives in common with all other human beings and other-than-human beings that dwell on this one earth.

Autistic Symphony offers a unique look at the fascinating subject of autism. Challenging the psychiatric and scientific perspectives that focus exclusively on disabilities and impairments, *Autistic Symphony* celebrates the challenges and rewards experienced by every autistic individual, and argues that far from

being a medical monster, autism is one of our culture's greatest strengths. Through five essays incorporating viewpoints from biology, history, anthropology, religion, science, art, and philosophy, *Autistic Symphony* explores the possibility autism has much to tell us about our species, and about the development of its modern civilizations.

A fascinating investigation of a beloved comic strip The internet is home to impassioned debates on just about everything, but there's one thing that's universally beloved: Bill Watterson's comic strip Calvin and Hobbes. Until its retirement in 1995 after a ten-year run, the strip won numerous awards and drew tens of millions of readers from all around the world. The story of a boy and his best friend — a stuffed tiger — was a pitch-perfect distillation of the joys and horrors of childhood, and a celebration of imagination in its purest form. In *Let's Go Exploring*, Michael Hingston mines the strip and traces the story of Calvin's reclusive creator to demonstrate how imagination — its possibilities, its opportunities, and ultimately its limitations — helped make Calvin and Hobbes North America's last great comic strip.

The Routledge Handbook of the Philosophy of Sport is a landmark publication in sport studies. It goes further than any book has before in tracing the contours of the discipline of the philosophy of sport and in surveying the core themes, approaches and theories that form its disciplinary fabric. The book explores the ways in which an understanding of philosophy can inform our understanding of important prevailing issues in sport. Edited by two of the most significant figures in the development of the philosophy of sport, Mike McNamee and Bill Morgan, and with contributions from many of the world's leading sport philosophers, this is an invaluable companion reference volume for any course in the social scientific study of sport, and an essential addition to the bookshelf of any serious scholar of the

How a revolutionary cartoonist opened the funnies to political commentary and biting satire

How do human beings today receive divine revelation? Where and in what ways is it mediated so that all generations can hear the fullness of the gospel? In this volume, distinguished theologian Matthew Levering shows that divine revelation has been truthfully mediated through the church, the gospel, and Scripture so that we can receive it in its fullness today. Levering engages past and present approaches to revelation across a variety of traditions, offering a comprehensive, historical study of all the key figures and perspectives. His thorough analysis results in an alternative approach to prevailing views of the doctrine and points to its significance for the entire church.

Life writing, in its various forms, does work that other forms of expression do not; it bears on the world in a way distinct from imaginative genres like fiction, drama, and poetry; it acts in and on history in significant ways. Memoirs of illness and disability often seek to depathologize the conditions that they recount. Memoirs of parents by their children extend or alter relations forged initially face to face in the home. At a time when memoir and other forms of life writing are being produced and consumed in unprecedented numbers, this book reminds readers that memoir is not mainly a "literary" genre or mere entertainment. Similarly, letters are not merely epiphenomena of our "real lives." Correspondence does not just serve to communicate; it enacts and sustains human relationships. Memoir matters, and there's life in letters. All life writing arises of our daily lives and has distinctive impacts on them and the culture in which we live.

In an increasingly complex world the natural human inclination is to oversimplify issues and problems to make them seem more comprehensible and less threatening. This tendency usually generates forms of dogmatism that diminish our ability to think creatively and to develop worthy talents. Fortunately, complexity theory is giving us ways to make sense of intricate, evolving phenomena. This book represents a broad, interdisciplinary application of complexity theory to a wide variety of phenomena in general education, STEM education, learner diversity and special education, social-emotional development, organizational leadership, urban planning, and the history of philosophy. The contributors provide nuanced analyses of the structures and dynamics of complex adaptive systems in these academic and professional fields.
