This book brings together diverse perspectives from the newest generation of scholars from Canada and China to better understand China in the 21st century. It examines China's socio-political structure, its particular relationship with Canada, and interaction with the international community; and discusses how to overcome the ideological differences between the two countries to establish positive and sustainable Canada-China bilateral relations for the future. Importantly, the perspectives are from young authors, with a different relationship to China (and Canada) than more established authors. This compilation helps breathe new life into the study of Sino-Canada relations from both countries, and to reassess and re-frame issues related to China in the 21st century.

What is the common element linking the right to health care and the right of free speech, the right to leisure and the right of free association, the right to work and the right to be protected? Debates on the rights of man abound in the media today, but all too often they remain confused and fail to recognize the fundamental political conceptions on which they hinge. Several French theorists have recently attempted a new account of rights, one that would replace the discredited Marxist view of rights as mere formalities concealing the realities of class domination. In this final volume of *Political Philosophy*, Luc Ferry and Alain Renaut summarize these efforts and put forward their own set of arguments.

Delves into the ancient debate regarding the nature and purpose of the seven sacraments What are the sacraments? For centuries, this question has elicited a lively discussion and among theologians, and a variety of answers that do anything but outline a unified belief concerning these fundamental ritual structures. In this extremely cohesive and well-crafted volume, a group of renowned scholars map the theologies of sacraments offered by key Christian figures from the Early Church through the twenty-first century. Together, they provide a guide to the variety of views about sacraments found throughout Christianity, showcasing the variety of approaches to understanding the sacraments across the Catholic, Protestant, and Orthodox faith traditions. Chapters explore the theologies of thinkers from Basil to Aquinas, Martin Luther to Gustavo Gutiérrez. Rather than attempting to distill their voices into a single view, the book addresses many of the questions that theologians have tackled over the two thousand year history of Christianity. In doing so, it paves the way for developing theologies of sacraments for present and future contexts. The text places each theology of the sacraments into its proper sociohistorical context, illuminating how the church has used the sacraments to define itself and its congregations over time. The definitive resource on theologies of the sacraments, this volume is a must-read for students, theologians, and spiritually interested readers alike.
