Focusing on areas common to all critically ill patients, including fluid therapy, sedation, shock, infection and other central topics, this reference to basic pathophysiological principles provides an excellent launch pad for a section on individual disease entities. The text is supported by problem-oriented guidelines to help the care provider tackle real-life practical problems. The new edition reflects the challenges of intensive care medicine, relevant to all residents, trainees, nursing staff and paramedics attached to the ICU. First Edition Pb (1996): 0-521-47812-X

Intensive care patients are the most critically ill in any hospital and they are a patient group that utilises a disproportionate amount of medical resources. Intensive care medicine, around for about 40 years, is a relatively recent but globally expanding specialty due to a growing geriatric population of discerning demand for health system. The older generation of intensivists are approaching retirement. The middle generation is trained in various medical specialties and then subspecialised in intensive care. These doctors now lead the way in clinical practice, research, management and training. On the other hand, the younger generation of intensivists includes an ever increasing number of doctors who, for the first time, enjoy a structured training program with clinical rotations, courses, and exam qualifications.

individual disease entities encompassing haematology, gastroenterology, nephrology, endocrinology, the respiratory system, cardiovascular pathology, poisoning and neurology. Economic and ethical issues are also covered, and the text is supported by numerous problem-oriented guidelines to help the care provider tackle real-life practical problems as encountered in the ICU. In the same spirit, wherever possible, the authors provide precise and meaningful advice, rather than bland generalisations. This new edition reflects the excitement, challenges and uniqueness of intensive care medicine, for the benefit of all residents, trainees, nursing staff and paramedics attached to the ICU.

Acute Care Casebook provides a case-based approach to the broad practice of acute care medicine, covering a variety of common patient presentations and clinical environments. This book features over 70 illustrated cases, including presentations of trauma and medical illness in wilderness medicine, military and prehospital environments, pediatrics, emergency medicine, and intensive care unit and floor emergencies. Designed for students and trainees in medicine, nursing, EMS, and other acute care specialties, this text guides readers through not only symptom evaluation and treatment, but also the thought process and priorities of experienced clinicians. Each chapter features key diagnoses and management pearls from leading experts that will help prepare readers for any event, from stabilizing and transporting a trauma patient in the field, to managing post-operative complications in the ICU.

Revision Notes in Intensive Care Medicine is a key resource for candidates preparing for postgraduate intensive care examinations. Mapped to the FFICM, EDIC and FCICM syllabuses, this title ensures candidates have all the information needed to prepare for their examinations. Information is presented in concise note form and bullet points with visually memorable tools, such as tables and diagrams, making revising and retaining key facts easier. Chapters are arranged into physiological systems, such as 'Respiratory Intensive Care' and 'Obstetric Intensive Care', and are subdivided into major clinical issues within each chapter so specific areas of further study can be found easily. Drawing from the authors' experiences as successful candidates, and carefully reviewed by consultants, Revision Notes in Intensive Care Medicine provides the foundation for postgraduate intensive care exam revision.

The Annual Update compiles reviews of the most recent developments in experimental and clinical intensive care and emergency medicine research and practice in one comprehensive reference book. The chapters are written by well recognized experts in these fields. The book is addressed to everyone involved in internal medicine, anesthesia, surgery, pediatrics, intensive care and emergency medicine.

The chapters are written by well recognized experts in these fields. The book is addressed to everyone involved in internal medicine, anesthesia, surgery, pediatrics, intensive care and emergency medicine.

In recent years, many clinical interventions in

# Download Free Clinical Intensive Care And Acute Medicine

intensive care medicine have been based on clear scientific evidence. However, at least as many clinical interventions still remain the subject of controversy, either due to a lack of rigorous data or due to the existence of conflicting data. In this book, these controversies are discussed by experts of international renown in their respective fields. The goal is twofold: To provide us with a balanced and unbiased presentation of the subject, explaining the different 'schools of thought' relevant to the controversy; To summarise the data with a clinically useful and valid recommendation for our practice. Virtually all fields of intensive care medicine are covered in more than 50 chapters dealing with controversies over treatment options in acute illness states, organising and providing care for acutely ill patients, as well as how to answer ethical questions arising in critical care medicine every day. with contributions from: MG Abate, L Abrahão Hajjar, S Afonso, F Álvarez-Lerma, P Amado, PJD Andrews, D Annane, D De Backer, J Bakker, O Barbosa da Silva, G Bellingan, K Bendjelid, A Biasi Cavalcanti, L Blanch, SI Blot, M Borelli, J Brokmann, C Bruel, C Brun-Buisson, J Carlet, J Chastre, BP Cholley, G Citerio, G Colin, A Combes, RC Costa Filho, C Cozowicz, BH Cuthbertson, D Crippen, J Cruz, R Dembinski, P Devos, J-M Domínguez-Roldán, G Ferreyra, S Finfer, H Flaatten, MJ Garcia Monge, E Gayat, T Geeraerts, FRB Gomes Galas, RD Griffiths, ABJ Groeneveld, O Grottke, O Hamzaoui, GT Henriques Filho, M Hiesmayr, M Imhoff, TC Jansen, AL Jardim, M Jonas, C Jones, JA Kellum, R Kitzberger, E Knobel, M Knobel, L Kramer, K Kranzer, S Kreyer, R Kuhlen, M Leone, A Liolios, T Lisboa, B Lortat Jacob, U Lucangelo, C-E Luyt, MR Macleod, R Maio, C
