Northern Albania and Montenegro are the only regions in Europe to have retained a true tribal society up to the mid-twentieth century. This book provides the first scholarly investigation of this tribal society, a pioneer work that offers a detailed survey of all the major Albanian-speaking tribes in Albania, Montenegro and Kosovo. Robert Elsie provides comprehensive material on the 69 different tribes, including data on their locations, religious affiliations, tribal structures and relations, population statistics, tribal folklore, legends and history. Also included are excerpts from the works of prominent nineteenth and early-twentieth century writers, such as Edith Durham and Johann Georg von Hahn, who travelled through the tribal regions, as well as short biographies on prominent figures linked to the tribes. As the first book of its kind, The Tribes of Albania will be of interest to scholars and students of the Balkans, of southeastern European anthropology, ethnography and history.

This book covers the latest in recycling and reuse research focused toward greater sustainability and includes chapters authored by the world’s leading thinkers and practitioners in the field. Topics covered include recycling and reuse, solid waste management, renewable energy, environmental studies, and wastewater management. This text contains environmental issues with an experimental focus, making this a useful resource to students, researchers, and professionals working in solid waste management, energy and water sustainability issues within the geoscience, engineering, and chemistry fields.

During the past few years two principally different approaches to the design of fuzzy controllers have emerged: heuristics-based design and model-based design. The main motivation for the heuristics-based design is given by the fact that many industrial processes are still controlled in one of the following two ways: - The process is controlled manually by an experienced operator. - The process is controlled by an automatic control system which needs manual, on-line 'trimming' of its parameters by an experienced operator. In both cases it is enough to translate in terms of a set of fuzzy if-then rules the operator's manual control algorithm or manual on-line 'trimming' strategy in order to obtain an equally good, or even better, wholly automatic fuzzy control system. This implies that the design of a fuzzy controller can only be done after a manual control algorithm or trimming strategy exists. It is admitted in the literature on fuzzy control that the heuristics-based approach to the design of fuzzy controllers is very difficult to apply to multiple-input/multiple-output control problems which represent the largest part of challenging industrial process control applications. Furthermore, the heuristics-based design lacks systematic and formally verifiable tuning tech niques. Also, studies of the stability, performance, and robustness of a closed loop system incorporating a heuristics-based fuzzy controller can only be done via extensive simulations.

A paradigm-shifting diet plan that allows you to eat anything you want, as much as you want—and still strip away 20, 40, 60 pounds, or more. After conducting extensive research at the Salk Institute and the National Institute on Aging, poring over copious amounts of new research in intermittent fasting, and engaging 2,000 people for a test panel, bestselling authors David Zinczenko and Peter Moore determined that people can lose remarkable amounts of weight eating the foods they like best—as long as they eat within a set 8-hour time period. Fasting is, of course, an ancient spiritual and health practice, but it's also a way to sidestep many of the ills of the modern world—including diabetes, heart disease, and cognitive impairment. Zinczenko and Moore demonstrate how simply observing this timed-eating strategy, even just three days a week, will reset your metabolism so that you can enter fat-burning mode first thing in the morning—and stay there all day long. And by focusing on eight critical, nutrient-rich Powerfoods, you can build in a second layer of protection against Alzheimer's, heart disease, and even the common cold. In the book, you will find motivating strategies, delicious recipes, and an 8-minute workout routine to maximize calorie burn. The 8-Hour Diet promises to strip away unwanted pounds and give you the focus and willpower you need to reach your goals for weight loss and life.

The thrilling and romantic second novel in the Incarnate trilogy, a fantasy series about a girl who is the first new soul born into a society where everyone else has been reborn hundreds of times. As a Newsoul, Ana has always felt alone. Some residents of Heart are afraid of Ana's presence, a constant reminder of unstoppable change and the unknown. When the people turn violent, Ana must learn to stand up not only for herself, but also for those who cannot stand up for themselves. Romantic and action-filled, the rich world of Asunder is perfect for fans of epic fantasy, like Graceling by Kristin Cashore and The Girl of Fire and Thorns by Rae Carson, while Ana's courage to expose the cracks in society and fight for what is right is ideal for fans of dystopian novels.

The prosecution plays a crucial part in any international war crimes trial, but its role is rarely analysed. This book will assess the work of the prosecutor in a dozen international criminal courts and tribunals, setting out the applicable rules and analysing his or her independence, accountability, and political impact.

This issue of Heart Failure Clinics—edited by Dr. Eduardo Bossone—will cover The Right Heart Pulmonary Circulation Unit. Topics include Pathophysiology, Increased Systemic versus Increased Pulmonary Pressures, Pulmonary Arterial Hypertension, Right Heart Pulmonary Circulation Unit in Connective Tissue Disease, Right Heart Pulmonary Circulation Unit in Congenital Heart Diseases, Pulmonary Hypertension and Heart Failure, Right Heart Pulmonary Heart Circulation Unit in Cardiomyopathies and Storage Diseases, Pulmonary Hypertension, Right Heart Pulmonary Circulation Unit at High Altitude, Chronic Thromboembolic Pulmonary Hypertension, Combining Invasive and Non-Invasive Evaluation for the Diagnosis of Pulmonary Hypertension. Imaging the Right Heart Pulmonary Circulation Unit: The Role of Ultrasound, Imaging the Right Heart Pulmonary Circulation Unit: The Role of CT and MRI, Biomarkers in Pulmonary Hypertension, Pulmonary Hypertension Related to Diffuse Parenchymal Lung Disease, Chronic Right Heart Failure, Exercise Training and Rehabilitation in Pulmonary Hypertension, and Right Heart Circulation Unit and Left Heart Valvular Diseases.

What made the Sopranos finale one of the most-talked-about events in television history? Why is sudoku so addictive and the iPhone so darn irresistible? What do Jackson Pollock and Lance Armstrong have in common with theoretical physicists and Buddhist monks? Elegance. In this thought-provoking exploration of why certain events, products, and people capture our attention and imaginations, Matthew E. May examines the elusive element behind so many innovative breakthroughs in fields ranging from physics and marketing to design and popular culture. Combining unusual simplicity and surprising power, elegance is characterized by four key elements—seduction, subtraction, symmetry, and sustainability. In a compelling, story-driven narrative that sheds light on the need for elegance in design, engineering, art, urban planning, sports, and work, May offers surprising evidence that what’s “not there” often trumps what is. In the bestselling tradition of The Tipping Point, Made to Stick, and The Black Swan, In Pursuit of Elegance will change the way you think about the world.

The founder of Wendy's International uses anecdotes to reveal the secrets behind his success, offering his marketing and management principles and discussing the connection between family values and business strength. Reprint.
