Santrock, Essentials of Life-Span Development, First Canadian Edition is an exciting new resource that offers essential content in a student-friendly format. Featuring shorter chapters and interactive study modules, Santrock 1ce covers all periods of the human life-span chronologically from the prenatal period through late adulthood and death. Santrock, Essentials of Life-Span Development, First Canadian Edition is ideal for one-semester Life-Span Development courses at both colleges and universities, or for any learner eager to explore the essentials of life-span development.

Providing a solid foundation in the normal development of functional movement, Functional Movement Development Across the Life Span, 3rd Edition helps you recognize and understand movement disorders and effectively manage patients with abnormal motor function. It begins with coverage of basic theory, motor development and motor control, and evaluation of function, then discusses the body systems contributing to functional movement, and defines functional movement outcomes in terms of age, vital functions, posture and balance, locomotion, prehension, and health and illness. This edition includes more clinical examples and applications, and updates data relating to typical performance on standardized tests of balance. Written by physical therapy experts Donna J. Cech and Suzanne "Tink" Martin, this book provides evidence-based information and tools you need to understand functional movement and manage patients' functional skills throughout the life span. Over 200 illustrations, tables, and special features clarify developmental concepts, address clinical implications, and summarize key points relating to clinical practice. A focus on evidence-based information covers development changes across the life span and how they impact function. A logical, easy-to-read format includes 15 chapters organized into three units covering basics, body systems, and age-related functional outcomes respectively. Expanded integration of ICF (International Classification of Function) aligns learning and critical thinking with current health care models. Additional clinical examples help you apply developmental information to clinical practice. Expanded content on assessment of function now includes discussion of participation level standardized assessments and assessments of quality-of-life scales. More concise information on the normal anatomy and physiology of each body system allows a sharper focus on development changes across the lifespan and how they impact function.

This book provides introductory coverage of growth and development throughout the lifespan. The content emphasizes normal aspects as well as the unique problems and health promotion needs of each age and stage of development. It features a strong health promotion theme structured around Healthy People 2020 objectives. Lifespan coverage from prenatal development to death helps students integrate concepts related to normal changes in each stage of the life cycle. Coverage of current research and trends in health care provide readers with the most up-to-date, accurate information. Health promotion and disease prevention, including Healthy People 2020 objectives, are highlighted throughout the book. Cultural content is highlighted throughout the book and in new Chapter 3: Cultural Considerations in Health Care to encourage students to consider cultural implications at every stage of development. Separate chapter on advanced old age and geriatrics (Chapter 14) discuss the theories, physiological changes, and psychological aspects of aging; health promotion and maintenance; and the role of health care providers in caring for the geriatric patient. All of this helps students understand how to maintain quality of life and promote health in advanced old age. Teaching techniques for every developmental stage are part of a consistent chapter format and provide age-appropriate patient education tips. Consistent chapter organization for each stage of growth and development makes information easy to access. Critical Thinking scenarios and questions appear at the end of each chapter to help students consider all variables when planning care across the lifespan. Student learning features include Objectives, Key Terms, Key Points, and Review Questions. Appendix A includes the FDA's Recommended Child and Adult Immunization Schedules, providing essential health promotion information. NEW Appendix B provides a Multilingual Glossary of Symptoms to enhance students' awareness of culturally sensitive care. Glossary includes definitions of Key Terms and additional terms help students review concepts and terminology at a glance. Bibliography is organized by chapter at the end of the book to facilitate additional research and study.

Understanding Lifespan Development

Recipient of the 2017 Most Promising New Textbook Award from the Textbook & Academic Authors Association (TAA) Chronologically organized, Lifespan Development: Lives in Context offers a unique perspective on the field by focusing on the importance of context—examining how the places, sociocultural environments, and ways in which we are raised influence who we become and how we grow and change. Author Tara L. Kuther integrates cutting-edge and classic research throughout the text to present a unified story of developmental science and its applications to everyday life. Robust pedagogy, student-friendly writing, and an inviting design enhance this exciting and inclusive exploration of the ways in which context informs our understanding of the lifespan.

The Life Span: Human Development for Helping Professionals, 4/e, provides an in-depth look at the science of human development, highlighting theories and research that have useful applications for individuals working in fields such as education, counseling, and social work. The main purpose of this book is to provide the reader with information that can be translated into professional " best practice " applications. Throughout, the text reflects the contemporary view that life span development is a process deeply embedded within and inseparable from the context of family, social network, and culture. Because the book is designed for graduate students, most topics, especially those that have special relevance to helping professionals, are covered in greater depth than in a typical life span text. The expanded coverage of research in these areas will enhance students' understanding of the scientific basis for application to practice. From reviews of the book: " This book is unique in that it is research-based, includes comprehensive coverage of important course topics, and offers helping professionals information about human development that will enhance service provision to clients across the lifespan. " --Mary M. Chittooran, Saint Louis University " The writing style is clear, interesting and engaging and is at a level appropriate for my students. Nicely done. . . . [The] case studies [and] developmental psychopathology sections are strengths. . . . [The book is] well organized, well-written, broad-based . . . , [and] insightful. [I] especially liked the authors' focus on practical and applied therapies, as well as their emphasis on research-based therapies that incorporate sound principles of human developmental. " --Rosalie A. Rohm, Ball State University " This readable, well organized text addresses the depth and scope of development. The text extends students knowledge of the material by providing a wealth of applicable information for those who are or will be in a helping profession. . . . [Compared to other available texts, this one is] far superior in terms of the balance of scope and depth. " --Kathryn Cooper, Northern Colorado University New Interactive, Multimedia Learning Features in the Video-Enhanced Pearson eText: o See real examples. Embedded videos illustrate and explain key concepts and show individuals addressing the challenges of that period of the life span. (See pages 334, 342, and 353 for examples.) o Practice applying

chapter content. The Practice Using What You've Learned feature includes scaffolded video and print case exercises that challenge readers to analyze and apply chapter content. Sample responses are available through the enhanced text. (See page 366 for examples.) See how to work with people at different stages of the lifespan. Applications sections blend empirically supported information about treatments with the issues covered in each chapter, offering extensive discussion of how developmental science can inform practice. These include topics such as adolescent health and well-being, new approaches to maternity care, new interventions for promoting secure infant attachments, encouraging learning through play, helping parents avoid corporal punishment, and mindfulness-based practices, among many others. (See 357-360 for an example.)
