latest in-depth, case-based counseling approaches to new, increasingly complex psychosocial issues of patients requiring assisted reproduction.

Infertility Counseling: A Comprehensive Handbook for Clinicians, 2nd edition, is a comprehensive, multidisciplinary textbook for all health professionals providing care for individuals facing reproductive health issues. It is the most thorough and extensive book currently available for clinicians in the field of infertility counseling, providing an exhaustive and comprehensive

# Read Book Fertility Counseling

review of topics. It addresses both the medical and psychological aspects of infertility, reviewing assessment approaches, treatment strategies, counseling for medical conditions impacting fertility, third-party reproduction, alternative family building and post infertility counseling issues. Each chapter follows the same format: introduction, historical overview, literature review, theoretical framework, identification of clinical issues, suggestions for therapeutic interventions, and future implication. This edition also includes

# Read Book Fertility Counseling

extensive appendixes of clinical tools useful to the clinician, including an Internet database of resources and an extensive glossary of terminology.

Using real-world cases, this clinical guide details the psychosocial challenges faced by patients navigating the world of medically assisted reproduction (MAR). It describes in depth the latest perspectives on counseling approaches to the evolving complexities of family creation, whether fertility issues are a presenting problem or occur during the course of therapy or the aftermath of a

struggle with infertility. Applying an evidence-based, cross-border approach, international experts not only discuss advanced perspectives on topics such as third party reproduction, pregnancy loss and adoption, but also newer issues of fertility preservation, 'older' patient parenthood, LGBT and singles' family creation. A comprehensive resource, it explores pioneering insights into fertility counseling such as spirituality, developing disclosure language, a counselor's personal fertility issues, and more. This is an essential aid for medical and mental health

professionals to develop and refine the skills needed to treat the increasingly diverse and complex needs of MAR patients.

"This book is for practicing psychologists in the field of fertility counseling and those considering entering this relatively new and evolving field. The goal is for these professionals to have a resource to help them resolve ethical dilemmas they encounter in their work. Using this book as a knowledge base will assist psychologists who are working with individuals and couples using the various assisted reproductive

technologies (ARTs) and those needing to fulfill, according to American Society of Reproductive Medicine guidelines, the psychological component of their assessment prior to being admitted into ART protocols. Our goal in this book is to provide guidance to mental health professionals and help them to avoid inadvertently crossing ethical boundaries. This book is meant to be thought provoking. We have undertaken to frame the issues and set forth the factors that should be considered when confronting a novel ethical problem fraught with conflicting

# Read Book Fertility Counseling

social and personal values. We provide a framework within which mental health professionals can attempt to balance the full range of perspectives and work toward a resolution of complex, ever-changing questions. The information contained in this book is concentrated on the relevant psychological, moral, ethical, and legal aspects of reproductive medicine as well as the various roles psychologists may play in fertility counseling"--Introduction. (PsycINFO Database Record (c) 2010 APA, all rights reserved).

Background: Cancer care

advances allow more patients to pursue fertility.

Unfortunately, treatments may have detrimental effects both fertility and risks to fetus should pregnancy occur. This study examines patientperceptions of fertility and contraception counseling, as well as physician documentation thereof. Methods: After IRB approval, a cross sectional study was performed identifying men and women, ages 18-50, seen between May 2017 and 2018 with newly diagnosed malignancy. Patients with previous sterilization procedures, a secondary or synchronous cancer, or prior lines of

chemotherapy, were excluded. Consented patients received a survey regarding their perception receipt and quality of counseling. Demographic data, including contraception use, reproductive history, and physician documentation were obtained. Differences in receipt of counseling and perception of received counseling were evaluated using chi square tests. Results: Of 179 patients identified, 53 ultimately participated. Majority were women (75 v 25%). Counseling documentation for contraception and fertility occurred in 5% and 32% of charts, respectively. Though

42% and 49% perceived receipt, respectively. Of those receiving counseling, it was perceived as sufficient by 64% regarding contraception and 72% regarding fertility. Race, gender, and reproductive history were not found to be associated to whether patients perceived counseling on contraception ( $p > 0.1$ ). Men were more likely than women to be perceive counseling regarding fertility (85 v 43%,  $p = 0.010$ ). However, both felt fertility counseling to be sufficient with similar rates of documentation. Caucasians were more likely to perceive

# Read Book Fertility Counseling

receipt of fertility counseling and to perceive it to be sufficient, then African Americans (68 v 29% and 70 v 40%, respectively) at same rate of documentation (35%).

Conclusions: Significant discrepancies in perception of contraception and fertility counseling were seen, though documentation rates were similar across all groups examined. Despite equal rates of physician documentation, gender and race were important factors for the perception of fertility counseling, while race was a factor to quality of perceived counseling.
