It's a wheely wonderful world! But why are you seeing just the dotted outlines of it? Create the pictures by connecting the dots one at a time. Working on dot to dots help to improve hand to eye coordination, fine motor skills, and imagination. You will be connecting the dots based on their numbers so you can use this activity to boost counting a

The main objective of this book is to explore the concept of cybersecurity in parallel and distributed computing along with recent research developments in the field. It also includes various real-time/offline applications and case studies in the fields of engineering and computer science and the modern tools and technologies used. Information on cybersecurity technologies is organized in the fifteen chapters of this book. This important book cover subjects such as: Research and solutions for the problem of hidden image detection Security aspects of data mining and possible solution techniques A comparative analysis of various methods used in e-commerce security and how to perform secure payment transactions in an efficient manner Blockchain technology and how it is crucial to the security industry Security for the Internet of Things Security issues and challenges in distributed computing security such as heterogeneous computing, cloud computing, fog computing, etc. Demonstrates the administration task issue in unified cloud situations as a multi-target enhancement issue in light of security Explores the concepts of cybercrime and cybersecurity and presents the statistical impact it is having on organizations Highlights some strategies for maintaining the privacy, integrity, confidentiality and availability of cyber information and its real-world impacts such as mobile security software for secure email and online banking, cyber health check programs for business, cyber incident response management, cybersecurity risk management Security policies and mechanisms, various categories of attacks (e.g., denial-of-service), global security architecture, along with distribution of security mechanisms Security issues in the healthcare sector with existing solutions and emerging threats.

A modern, magic adventure with a difference. The Key element is humour. The delivery is pacey, direct and very action based. Characters are believable, with quirky personalities. A hilarious story of a dizzy witch and her two best friends, a lazy cat and a neurotic mouse, who make spells in the crazy kitchen of their magic house in Parsley Lane.

This work presents different hidden Markov model (HMM) based spectrum occupancy prediction schemes for filter bank based multi-carrier (FBMC) transmission applications. By employing a discrete Fourier transform-modulated filter bank (DFT-FB), the SU receiver can efficiently explore the time-frequency (TF) characteristics of the received signal to be utilized in a suitable prediction scheme.

Who wants to play Sudoku? Good, count me in! Sudoku is a traditional math game that has survived the times before it continues to be well played and loved. It comes loaded with mental and emotional benefits. It help you focus better, have longer patience and work harder to achieve the result you want. It also encourages you to memorize and use your logical and analytical skills. Play today!

This book gathers selected research papers presented at the International Conference on Recent Trends in Machine Learning, IOT, Smart Cities & Applications (ICMISC 2020), held on 29 – 30 March 2020 at CMR Institute of Technology, Hyderabad, Telangana, India. Discussing current trends in machine learning, Internet of things, and smart cities applications, with a focus on multi-disciplinary research in the area of artificial intelligence and cyber-physical systems, this book is a valuable resource for scientists, research scholars and PG students wanting formulate their research ideas and find the future directions in these areas. Further, it serves as a reference work anyone wishing to understand the latest technologies used by practicing engineers around the globe.

The book focuses on both theory and applications in the broad areas of communication technology, computer science and information security. This two volume book contains the Proceedings of 4th International Conference on Advanced Computing, Networking and Informatics. This book brings together academic scientists, professors, research scholars and students to share and disseminate information on knowledge and scientific research works related to computing, networking, and informatics to discuss the practical challenges encountered and the solutions adopted. The book also promotes translation of basic research into applied investigation and convert applied investigation into practice.

This book discusses the development of radio-wave tomography methods as a means of remote non-destructive testing, diagnostics of the internal structure of semi-transparent media, and reconstruction of the shapes of opaque objects based on multi-angle sounding. It describes physical-mathematical models of systems designed to reconstruct images of hidden objects, based on tomographic processing of multi-angle remote measurements of scattered radio and acoustic (ultrasonic) wave radiation.

The activities of pro-Israel pressure groups and lobbyists in the US are well-known. But the pro-Israel lobby in Europe is less prominent in both academic and media accounts. In a unique account, Elvira King identifies the pro-Israeli groups which attempt to influence policy-makers and implementers in the EU, specifically examining Christian Zionist groups. Through a detailed study of the European Coalition for Israel (ECI), the only Christian Zionist lobby in Brussels, Elvira King analyses whether and how a religious group can (and can fail to) influence decision-makers in the EU. By exploring the context of European relations with Israel as well as the mechanisms through which pressure groups are able to influence EU-wide policies, King offers an analysis which demonstrates how the EU can be a site where religion and politics meet, rather than just being a secular institution. It therefore contains vital primary research for both those interested in the pro-Israel lobby as well as those examining the role of religion in politics more generally.

A series of bad choices led caterer Teresa Steplowski to a romance with a reality star--including their sex life being aired on the show. Her conservative family is horrified, her best friend is too occupied with planning a wedding to offer support, and her pregnant roommate feels the need to share everything she learns about the natural birthing process. In great detail. Plus, the reality star ex-boyfriend doesn't understand why she broke up with him and wants her back. Teresa desperately needs an escape from her life and worries she won't be able to put the brakes on the next crazy decision she might make. A rendezvous with a sexy stranger provides a distraction, but it isn't until she enters a cooking show contest and meets struggling novelist Gabe De Luca that things really begin to heat up.
