More than any other introductory psychology textbook, the Hockenburys' brief book presents the discipline with a unique understanding of today's students--emphasizing its relevance and immediate impact on their lives. Without sacrificing science, the authors draw on personal experiences and anecdotes to

illustrate essential concepts and important research direction. The "Fourth Edition" incorporates hundreds of new research studies throughout, with particular attention to areas of intensive current research and enduring student interest, including neuroscience, lifespan development, memory, and gender and culture issues. Also new is the dramatically enhanced media and supplements package, offering more ways than ever to help students make the study of psychology a part of their world.

Sandra Hockenbury and new coauthor Susan Nolan's remarkable textbook is grounded in the belief that all kinds of students can develop a real understanding of psychology and lasting scientific literacy. The authors act on that belief by using relatable personal stories to communicate the concepts of psychological science (and the process of science itself), and by presenting important research in a clear not oversimplified way. Hockenbury and Nolan also take full advantage of online learning, creating activities in LaunchPad that have students thinking about psychology as scientists do. New co-author, Susan Nolan of Seton Hall University was recently designated a Master Teacher by the Society for Teaching Psychology. She regularly gives talks about incorporating scientific literacy into the introductory course and across the psychology curriculum.

Edition after edition, Hockenbury and Hockenburys bestseller finds innovative ways to fulfill its enduring mission: to provide an accessible introduction to psychology that will connect the course to students lives without oversimplifying the fields research foundations. Again anchored by the Hockenburys personal storytelling approach, the rigorously updated new edition offers a wealth of new material and features (including a three-dimensional model brain that can be bound with each textbook) and a dramatically expanded media/supplements package. DSM 5 Updates Available for Fall 2014 classes, this update version features new content from Sandra Hockenbury in response to the release of the DSM-5. This new content is integrated into the text without changing pagination or the structure of the chapters. A special DSM 5 Supplement

by Sandra Hockenbury is available for Fall 2013 and Spring and Summer 2014 courses

"This book is designed to help students organize their thinking about psychology at a conceptual level. The focus on behaviour and empiricism has produced a text that is better organized, has fewer chapters, and is somewhat shorter than many of the leading books. The beginning of each section includes learning objectives; throughout the body of each section are key terms in bold followed by their definitions in italics; key takeaways, and exercises and critical thinking activities end each section"--BCcampus website.

With its comprehensive, authoritative coverage and student-centered pedagogy, *DISCOVERING BEHAVIORAL NEUROSCIENCE: AN INTRODUCTION TO BIOLOGICAL PSYCHOLOGY*, 3rd Edition is ideal for a broad range of students taking a beginning undergraduate course in biological or physiological psychology. Retitled in this edition to reflect the increasing interest in, and importance of, neuroscience, the book provides a foundational understanding of the structure and function of the nervous system and its relationship to both typical and disordered human behavior. Written by an author with more than 30 years of teaching experience at schools ranging from community colleges to the Ivy League, this text

presents classic concepts, current topics, and cutting-edge research in a style that is both accessible to beginning and less-prepared students and appealing to students with stronger backgrounds. As a result, the book allows instructors to teach a rigorous course that does not oversimplify the material, while keeping students excited and engaged. Reviewers have praised the text's clear narrative, high-interest examples, pedagogy, and purposeful art program. Updated with hundreds of new citations and to reflect changes in the DSM-5, this edition also includes new boxed features on ethics, careers, research, and health to engage students in the material, promote critical thinking, and prepare students for their future professions. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

It's a simple, best-selling combination that has worked for thousands of students – short, accessible essays and helpful, thorough writing instruction. Models for Writers continues to offer thought-provoking selections organized to demonstrate not only the rhetorical patterns that students will use in their own essays but also the elements and language that will make those essays effective. This edition offers more coverage of the key elements of academic writing, including new strategies for writing a

This is the access card only and does not include the textbook. LaunchPad contains resources for you and your students; it combines an interactive e-book with high-quality multimedia content and ready-made assessment options, including LearningCurve adaptive quizzing. Curated pre-built units are easy to assign or adapt with your own material, such as video, animations, simulations, readings, quizzes, discussion groups and more. LaunchPad also provides access to a grade book that shows both class and individual student performance, and for individual assignments as well. While a streamlined interface helps students focus on what's due next, social commenting tools let them engage, make connections, and learn from each other. Use LaunchPad on its own or integrate it with your school's learning management system so your class is always on the same page.

David Myers' new partnership with coauthor C. Nathan DeWall matches two dedicated educators and scholars, each passionate about teaching psychological science through writing and interactive media. With this new edition of the #1 bestselling Psychology, Myers and DeWall take full advantage of what an integrated text/media learning combination can do. New features move students from
