From my experience with a 620 press wheel drill they don't have enough down pressure on the disc openers to no till. Mine didn't have the grass seeders attachment, mainly drilled soybeans and a little wheat with it. I would inspect it very closely as parts are hard to come by and expensive. . Especially check the rubber press wheels for cracking, dry rot and the centers of the press wheel rims ...

Dad had a set of 620 drills from around 1973 to 1990. They were 2 12' hooked together, 6" spacing. Yes the packer wheels drive the drill, drive is on the center gang. We used them for wheat, barley & oats. Ours was a double disk with steel packer wheels, some had rubber. It worked good, but the ground had to be prepared well, not for minimum tillage. We pulled it mostly with a 1066 hydro, but in hilly ...

Absolutely. I've got the same drill without the fertilizer box. I found a NOS IH Operators/Parts manual from 1950 on FleaBay (9 bucks). As far as parts, I believe that there's some interchange between the M, 10 and 510. There are also a ton of old M drills around for parts.
