wear gloves. Indeed, many complaints have centred on this single concern alone. You can complete our infection control module online on Prism. This 30 minute interactive module highlights the common risks and pitfalls associated with cross-infection control and suggest ways of managing these areas of risk.

## Infection control - Dental Protection

Although the principles of infection control remain unchanged, new technologies, materials, equipment, and data require continuous evaluation of current infection control practices. The unique nature of many dental procedures, instruments, and patient care settings also may require specific strategies directed to preventing pathogen transmission among dental health care personnel and their patients.
