This book is the result of a six-year investigation into the phenomenon of 'national piano schools' with a particular focus on establishing a definition of it. The book describes the current state of national schools and their evolution - particularly in the twentieth and twenty-first centuries. From references in topic related literature to Russian, Austro-German and French piano schools, as well as other less well documented ones, the author identifies key areas through which they may be defined. The book describes current perceptions of national piano schools, collected through interviews with contemporary

piano professionals and an internationally distributed questionnaire. To add another dimension to the topic, the author explores issues related to teacher-student lineages across the ages as one of the supposedly main carriers of piano tradition. As a result, this book proposes a definition of a national piano school in terms of three broad areas: national characteristics, traditions of interpretation, and individual personality. The descriptions derived from the literature, interviews and questionnaire data resulted in various national piano schools (most notably Russian, French, German and American) being identifiable in such areas as: history, political circumstances, cultural and compositional heritage, language, conditioning, instrument type, key archetypes, generalized personality traits, technique, sound, aesthetics, phrasing, repertoire and individual personality. The changes in national schools are summarized as conforming to a trend towards unification and homogeneity, and the author presents a case that currently their unique character is much less pronounced, in some cases, as suggested by the data, to the extent of complete extinction. A nice addition to this book is the inclusion of the author's custom designed 'genealogical trees of pianism', presented here, in full, in Appendix A. This publication is a near-verbatim reproduction of the author's doctoral research of the same title. The decision to publish in book form was driven by the goal of introducing this academic research to a wider audience, and ensuring that the work invested in this study would foster further discussion.

Here are 167 quotations to inspire or to bring hope in times of trouble. A really thoughtful gift.

Now updated with new material by #1 New York Times bestselling author and 2020 Democratic presidential candidate Marianne Williamson, the twentieth anniversary edition of *Healing the Soul of America* shares her timeless, visionary message of political healing. In the twentieth anniversary edition of *Healing the Soul of America*, Marianne Williamson reclaims her powerful voice for social conscience in American society. This is a time, according to Williamson, for Americans to return once again to our first principles, both politically and spiritually. Here, Williamson draws plans to transform the American political consciousness and encourage powerful citizen involvement to heal our society. With updated material throughout, Williamson explores the current state of American politics, reminding us of her theory of holistic politics—the convergence of political activists looking toward spiritual wisdom and spiritual contemplatives extending their service into the political landscape. She believes that a morally concerned American must now take an active stand in turning this country away from its current identity as a nation obsessively in love with its money to a nation more seriously invested in all of its children and the potential brilliance of every citizen. “Marianne Williamson is attempting to help not only her followers but an entire nation” (People). In the wake of the current political dysphoria, with countless tragedies consistently on the nightly news, America is facing a time of immense division. Political parties that completely polarize friends and family, mass shootings, threats of nuclear war, and a lack of confidence in our governmental leaders show that the country is in desperate need of restoration. We need a new paradigm of political understanding, a moral commitment to express it, and a new kind of activism to bring it forth. *Healing the Soul of America* is a blueprint for all three and there has never been a more urgent need.
