## *20+ Laryngeal Evaluation Indirect Laryngoscopy To High ...*

Although indirect laryngoscopy is a “low-tech” method of laryngeal evaluation, facility with the technique requires significant practice, and most physicians have abandoned it in favor of the easily performed and well-tolerated flexible laryngoscopy. As a result, indirect laryngoscopy is rapidly becoming a lost art. Although the days of an otolaryngologist (let alone a primary care physician) wearing a head mirror may be numbered, indirect

*Laryngeal Evaluation: Indirect  
Laryngoscopy to High-Speed*

Stroboscopy is not the only technique available for a detailed evaluation of laryngeal movement and pathology; others include electroglottography, videokymography, and high-speed digital imaging, and some techniques may be complementary. 34

High-speed digital processing has the advantage of capturing images as often as 5000 frames per second, acquiring many images from within a single glottic cycle, rather than relying on the multiple cycles that constitute the stroboscopic motion ...
