1866-69 include Proceedings of the National Association of School Superintendents; 1870 includes Addresses and journal of proceedings of the Central College Association.

The first Canadian edition of Practical Financial Management is the latest milestone in a journey in education shared by the authors. They believe that most finance texts are harder for students to understand than they should be. The issue is relatively unique to this field. Practical Financial Management is unique because of its approach to teaching finance; that approach is the result of a combination of classroom and practical experience. The book is easy to read, enjoyable, and non-intimidating. In other words, the text is accessible and the reviewers have been unanimous in their praise of the work's conversational style and readability.

Text develops the concepts and theories of data structures and algorithm analysis in a gradual, step-by-step fashion, proceeding from concrete examples to abstract principles. The author discusses many contemporary programming topics in the C language, including risk-based software life cycle models, rapid prototyping, and reusable software components. Also provides an introduction to object oriented programming using C++. Annotation copyright by Book News, Inc., Portland, OR
