When looking at any Lister engine, rotation is defined by which way the flywheel runs when it is viewed from the flywheel end of the engine. Standard build for the SR series is clockwise rotation. Anti-clock engines may have the letter 'A' immediately after the engine type and cylinder number on the engine number plate (e.g. 'SR3A').

This engine was bought by my father to fit in his 23ft narrowboat which I have been refitting for him, the wood work and all inside is complete so we are now turning back towards the engine to get him going. He had someone attempt to fit this some time ...
