Special emphasis is placed on entrepreneurship in the Indian environment with detailed discussions on the development of small-scale industry, the role of institutional support, and the importance of preparation of projects for entrepreneurial ventures. The book lays emphasis on simplified definitions and point-wise presentation of theoretical concepts. By adopting an application-oriented approach, it also provides numerous real-life examples, vivid illustrations, and inspirational case studies which play the dual role of explaining concepts as well as instilling entrepreneurial zeal in students.

About the Book: Of late, academicians of technical education have felt the importance of "Management" and "Entrepreneurship". Engineers need to manage their departments/sections/subordinates, and Entrepreneurship helps the large pool of technical manpower in developing small-scale industries in high tech areas thereby contributing to the economy of the country. This book covers both 'Management' and 'Entrepreneurship'. The first chapters of this book deal with Management, Planning, Organizing and Staffing, Directing and Controlling. The last four chapters deal with Entrepreneurship, Small-Scale Industries, Institutional support and Project formulation. Adequate number of simple examples with which the students are familiar are included in each chapter. In addition, each chapter contains student learning activities to give the readers a chance to enhance the learning process. Though the book is written keeping in mind the syllabus of Visvesvaraya Technological University, yet it is useful for B.Com, BBM, DBM,. PGDBM and MBA students also. Contents: Management Planning Organizing and Staffing Directing and Controlling Entrepreneurship Small-Scale Industries Institutional Support Preparation of Project.
