Measuring Scholarly Impact: Methods and Practice by Ying Ding

approach of how to measure impact, choosing between monitoring, evaluation and research (or a combination of the three). The decision on which to use will depend upon: resources you have available, the internal and external expertise you can call upon, and what stage you are at with your impact measurement 'journey' (click here for our guide). There are also several different

Steps to Effective Impact Measurement

First, the most commonly studied types of bibliometric networks (i.e., citation, co-citation, bibliographic coupling, keyword co-occurrence, and coauthorship networks) are discussed, and three popular visualization approaches (i.e., distance-based, graph-based, and timeline-based approaches) are distinguished.
