Mild head injury can leave people with a range of concussion symptoms including dizziness, nausea, confusion or an inability to process or retain information, sensitivity to light, and vision distortion. In the early stages after a mild head injury, there is a small risk of developing complications that may require emergency treatment.

Mild head injury and concussion | Headway

Drawing on the expertise of several well-known figures in the medical, neuropsychological, and legal professions, Forensic Evaluation of Traumatic Brain Injury: A Handbook for Clinicians and Attorneys, Second Edition provides a concise, general overview of the forensic assessment process and the issues surrounding Traumatic Brain Injury (TBI).

The Forensic Evaluation of Traumatic Brain Injury: A ...

Background: Patients with mild traumatic brain injury (mTBI) are frequently transferred to level 1 trauma centers (L1TC) if they have minor findings on a computerized tomographic scan of the head due to the absence of continuous neurosurgical coverage in community hospitals (CH). We hypothesized that such patients can be safely managed at community hospitals with a qualified Trauma team.
