Monkeyluv was an enjoyable collection of essays on evolution, society, biology, psychology, a slew of other -ologys & how they all come together to help give us a better understanding of ourselves. It was an enjoyable read on some extremely fascinating topics. That point leads me to the book's largest deficiency: some of the essays are too short.

'Monkeyluv': Primates Are People, Too -
The New York Times

Monkeyluv is a book of essays by Robert
Sapolsky on animal (and human) behavior.
I really loved A Primate's Memoir - his
adventures in Africa studying baboons - so
I got this on a whim. It's divided into three
sections: the first, and most scientific,
discusses the interactions of genes with the
environments in which they're placed.
