Example 4: Multiply:

$5.27 \times 0.01$ . Analysis:

There are two decimal digits in each factor.

Step 1: Estimate the product. Step 2:

Multiply to find the product. Multiply these decimals as if they were whole numbers. Ignore the decimal point.

Compensate by placing the decimal point in the product.

How to Multiply  
Decimals. Just follow  
these steps: Multiply  
normally, ignoring the  
decimal points. Then  
put the decimal point in  
the answer - it will have  
as many decimal places

# Where To Download Name

as the two original numbers combined. In other words, just count up how many numbers are after the decimal point in both numbers you are multiplying, then the answer should have that many numbers after its decimal point.
