Some conferences produce proceedings, others an inspiration to labor, which finally leads to a published work. Such has been the case with regard to this volume. In 1984, the Center for Ethics, Medicine, and Public Issues held a conference with the title 'When are Competent Patients Incompetent?' with the support of the Texas Committee for the Humanities, a state-based program of the National Endowment for the Humanities. Assistance was provided by both Baylor College of Medicine and the Institute of Religion. This conference evoked a considerable interest in examining further the moral status of competency determinations in the clinical setting. This interest is realized in this volume, which now affords us an opportunity to thank all those individuals who made the conference possible, only some of whom are acknowledged in this Preface. In particular, we wish to express our gratitude to Baruch A. Brody, Rebecca Dresser, the Honorable Jerome Jones, H. Steven Moffic, Margery W. Shaw, Eleanor Tinsley, and Albert Van Helden. The volume took its shape through the labors of Earl Shelp and Mary Ann Gardell Cutter, who inspired the further evolution of the papers presented at the conference and attracted contributions from individuals who had not attended. Earl Shelp and Mary Ann Gardell Cutter have produced a volume following extensive reflection and dialogue; they were ably assisted in the final preparation of the manuscript by Thomas J. Bole III and George Khushf, to whom special thanks are due.

The Manual of Tests and Criteria contains criteria, test methods and procedures to be used for classification of dangerous goods according to the provisions of Parts 2 and 3 of the United Nations Recommendations on the Transport of Dangerous Goods, Model Regulations, as well as of chemicals presenting physical hazards according to the Globally Harmonized System of Classification and Labelling of Chemicals (GHS). As a consequence, it supplements also national or international regulations which are derived from the United Nations Recommendations on the Transport of Dangerous Goods or the GHS. At its ninth session (7 December 2018), the Committee adopted a set of amendments to the sixth revised edition of the Manual as amended by Amendment 1. This seventh revised edition takes account of these amendments. In addition, noting that the work to facilitate the use of the Manual in the context of the GHS had been completed, the Committee considered that the reference to the "Recommendations on the Transport of Dangerous Goods" in the title of the Manual was no longer appropriate, and decided that from now on, the Manual should be entitled "Manual of Tests and Criteria".

Selected by the Modern Library as one of the 100 best nonfiction books of all time From the Modern Library's new set of beautifully repackaged hardcover classics by Truman Capote—also available are *Breakfast at Tiffany's* and *Other Voices, Other Rooms* (in one volume), *Portraits and Observations*, and *The Complete Stories* Truman Capote's masterpiece, *In Cold Blood*, created a sensation when it was first published, serially, in *The New Yorker* in 1965. The intensively researched, atmospheric narrative of the lives of the Clutter family of Holcomb, Kansas, and of the two men, Richard Eugene Hickock and Perry Edward Smith, who brutally killed them on the night of November 15, 1959, is the seminal work of the "new journalism." Perry Smith is one of the great dark characters of American literature, full of contradictory emotions. "I thought he was a very nice gentleman," he says of Herb Clutter. "Soft-spoken. I thought so right up to the moment I cut his throat." Told in chapters that alternate between the Clutter household and the approach of Smith and Hickock in their black Chevrolet, then between the investigation of the case and the killers' flight, Capote's account is so detailed that the reader comes to feel almost like a participant in the events.
