Prime Time - 6TH GRADE MATH

This is a game for two players. The first player chooses a positive even number that is less than 50, and crosses it out on the grid. The second player chooses a number to cross out. The number must be a factor or multiple of the first number. Players continue to take it in turns to cross out numbers, at each stage choosing a number that is a factor or multiple of the number just crossed out by the other player.

Factors and Multiples Game - NRICH

To sum up, we can say that factors are the numbers that can be multiplied to get another number. On the other hand, multiples are the product, that one can get by multiplying a number with another. When a number possesses only two factors, i.e. 1 and itself, then that number will be known as a prime number.

Difference Between Factors and Multiples (with Example and ...

LCM Sudoku Age 14 to 16 Challenge ...

Factors, Multiples and Primes

1 is a factor of every whole number, because every integer is divisible by one. Examples. 3 and 7 are both factors of 21 because 3 × 7 = 21. 10 and 6 are both factors of 60 because 10 x 6 = 60. 7 is not a factor of 24 because 24 is not divisible by 7 (24 ÷ 7 = 3 remainder 3). Multiples and Factors are connected with each other:

Factors, Multiples and Primes - YouTube

For example, the proper factors of 12 are 1, 2, 3, 4, and 6. Although 12 is also a factor of 12, it is not considered a proper factor. All of the proper factors that Player 2 selects will be colored red. Player 2 will receive 1 + 2 + 3 + 4 + 6 = 16 points for selecting all of the proper factors. Players reverse roles.
