The cost of these is around £70-£80 (\$90-\$100) so it ' s pricey but not so expensive so as to not be worth a look. I ' m thinking of getting one for my back-up camera body to use with manual focus lenses. Pros. Very effective at consistently nailing pin-sharp manual focus images; Can be replaced and altered without specialist tools or knowledge; Cons

3 tools to help you get super sharp manual focus shots ...

Manual focus lens structure and build are much less complicated than autofocus lenses. The higher quality older lenses are sturdy and robust. There are three main things to look out for in second-hand lenses: Indications that they have been dropped or otherwise mistreated.

Diversify Your Gear Options With Old, Manual Focus Lenses

Originally Answered: how do I get sharp photos with manual focus lens? Generally the "sweet spot" for a lens, where it does best, is two to three stops down from wide open. Wide open, you'll get maximum "benefit" from the uncorrected aberrations left in the lens design, and stopped down to the far end, you start getting diffraction around the diaphragm, causing slight image degradation.

How to get sharp photos with manual focus lens - Quora

At small apertures the depth of field, or DOF, becomes large. Also, with sharp lenses, one does not need to nail focus exactly on the subject. Even if focus is slightly off, the subject will be...
