S.C.A.M.P.E.R.: Inventive Thinkingsit Systematic Inventive Thinking

SIT (systematic inventive thinking) is a method that helps people break away from their patterns of thinking to come up with innovative ideas on demand and translate them into actions. Outside the box – out.

SIT - Systematic Inventive Thinking

Systematic Inventive Thinking (SIT) is a thinking method developed in Israel in the mid-1990s. Derived from Genrich Altshuller 's TRIZ engineering discipline, SIT is a practical approach to creativity, innovation and problem solving, which has become a well known methodology for innovation. At the heart of SIT's method is one core idea adopted from Genrich Altshuller's TRIZ which is also known as Theory of Inventive Problem Solving (TIPS): that inventive solutions share common patterns.

Systematic inventive thinking - Wikipedia

Systematic Inventive Thinking (SIT) is a thinking methodology where creativity takes centre stage. It contains five thinking patterns that humans have used for thousands of years. It directly contradicts the principle of 'thinking outside the box' and uses 'thinking inside the box' as a guiding principle in order to prove that creativity is not the prerogative of only a few.

Systematic Inventive Thinking (SIT) - toolshero

Systematic Inventive Thinking (SIT) is an innovation method that harnesses five thinking patterns that mankind has used for thousands of years. SIT has been expanded to cover a wide range of innovation-related phenomena in a variety of contexts. By using SIT, companies have produced breakthrough results in many types of situations. Surprisingly, the majority of new, inventive, and successful products result from just five patterns: subtraction, division, multiplication, task unification ...
