MDS-JB920 - MiniDisc

JUST SHARING: I transplanted a working MDS JE520 minidisc mechanism to this machine after its stock laser failed & the unit shut down. All the flex cable terminals & power supply cable matched and I'm back listening to the great sound of this model. Don't hesitate to use the Sony MDS-JE520 mechanism on a Sony MDS-JB920 or the other way around. I successfully did it! I hope this helps minidisc ...

MD Community Page: Sony MDS-JB920 - MiniDisc

I have had this unit MDS-JB920 for close to a year now. I have had no problems at all with it. I have noticed disc's played in it sound better and the analog output is excellent. I had a 520 and it had audible high pitched noise in the analog output. I would recommend this unit to anyone when it was \$400.00 ++, now that it is in the \$200-300 range it is an even better deal.

Review of Sony Minidisc Deck MDS-JB940 (QS Series) Eugene Dolan August 2001 [email protected] Introduction I have been a recording enthusiast for many years and have owned open reel recorders in the past and, at present, a Teac DAT DAP 20 recorder, a Nakamichi BX300 3-head cassette recorder, and a Marantz DR 4050 CD Recorder, all of which give excellent results. I have done a number of live ...
