STRUCTURAL OPENINGS FOR TIMBER STUD WALLS
Once an extension has been made weather-proof an opening is normally made through the existing external walls. This can be achieved by removing any existing French doors, patio or window openings and, providing the span of and loading on the existing lintel over the existing doors or windows is not increased, further support is not normally needed. If a new or wider opening is to be formed, the remaining wall above the new opening will need to be supported.

Building Regulations: Structural Opening | Extensions ...
