Prev. 9th ed. entered under: Polloway, Edward A.

Written by a teacher for teachers, this engaging book provides more than 100 practical strategies for students with learning disabilities, along with guidance on accommodations and assessment.

Featuring a wealth of reflection activities and connections to standards, this concise, easy-to-read teaching methods text equips students with the content knowledge and skills they need to become effective K – 8 teachers. The book maximizes instructional flexibility, reflects current educational issues, highlights recent research, and models best pedagogical practices. Current and realistic examples, a section in each chapter on using technology in the classroom, and material on differentiating instruction for diverse learners—including students with special needs and English language learners—make this a must-have resource for any K – 8 teacher.

This book provides guidelines for using constructivist teaching methods with English language learners and includes classroom examples, grade-level connections, and strategies that promote educational equity.

Miriam, a freshman Calculus student at Louisiana State University, made 37.5% on her first exam but 83% and 93% on the next two. Matt, a first year General Chemistry student at the University of Utah, scored 65% and 55% on his first two exams and 95% on his third—These are representative of thousands of students who decisively improved their grades by acting on the advice described in this book. What is preventing your students from performing according to expectations? Sandra McGuire offers a simple but profound answer: If you teach students how to learn and give them simple, straightforward strategies to use, they can significantly increase their learning and performance. For over a decade Sandra McGuire has been acclaimed for her presentations and workshops on metacognition and student learning because the tools and strategies she shares have enabled faculty to facilitate dramatic improvements in student learning and success. This book encapsulates the model and ideas she has developed in the past fifteen years, ideas that are being adopted by an increasing number of faculty with considerable effect. The methods she proposes do not require restructuring courses or an inordinate amount of time to teach.

They can often be accomplished in a single session, transforming students from memorizers and regurgitators to students who begin to think critically and take responsibility for their own learning. Sandra McGuire takes the reader sequentially through the ideas and strategies that students need to understand and implement. First, she demonstrates how introducing students to metacognition and Bloom's Taxonomy reveals to them the importance of understanding how they learn and provides the lens through which they can view learning activities and measure their intellectual growth. Next, she presents a specific study system that can quickly empower students to maximize their learning. Then, she addresses the importance of dealing with emotion, attitudes, and motivation by suggesting ways to change students' mindsets about ability and by providing a range of strategies to boost motivation and learning; finally, she offers guidance to faculty on partnering with campus learning centers. She pays particular attention to academically unprepared students, noting that the strategies she offers for this particular population are equally beneficial for all students. While stressing that there are many ways to teach effectively, and that readers can be flexible in picking and choosing among the strategies she presents, Sandra McGuire offers the reader a step-by-step process for delivering the key messages of the book to students in as little as 50 minutes. Free online supplements provide three slide sets and a sample video lecture. This book is written primarily for faculty but will be equally useful for TAs, tutors, and learning center professionals. For readers with no background in education or cognitive psychology, the book avoids jargon and esoteric theory.

Note: This is the bound book only and does not include access to the Enhanced Pearson eText. To order the Enhanced Pearson eText packaged with a bound book, use ISBN 0134057295. 50 Strategies for Teaching English Language Learners includes a rich assortment of practical strategies aligned to TESOL standards, which have been field-tested in diverse classrooms. Each strategy includes a brief explanation, step-by-step instructions on how to plan and use the strategy, and classroom scenarios demonstrating how the strategy can be adapted for different grade levels and content areas. To ensure that all students receive quality instruction, Teaching Students with High-Incidence Disabilities prepares preservice teachers to teach students with learning disabilities, emotional behavioral disorders, intellectual disabilities, attention deficit hyperactivity, and high functioning autism. Focusing on research-based instructional strategies, Mary Anne Prater gives explicit instructions and strategies for teaching students with special needs, and includes examples throughout in the form of scripted lesson plans. Real-world classrooms are brought into focus through teacher tips, embedded case studies, and technology spotlights to enhance student learning. The book also emphasizes diversity, with a section in each chapter devoted to exploring how instructional strategies can be modified to accommodate diverse exceptional students.

This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. A classic in the field, the tenth edition of Strategies for Teaching Learners with Special Needs offers the most comprehensive look at how to teach students with mild/high incidence disabilities. Balancing elementary and secondary teaching strategies, the text introduces critical areas of concern for special educators, includes a new chapter on curriculum development and launches into strategies for teaching students specific content areas. This edition includes separate chapters on science and social studies, updated chapters on reading and written language, and an expanded focus on transitions and functional academics. Throughout each chapter, culturally responsive practices are highlighted, technology rich solutions are explored, and formal assessment instruments are summarized so readers learn how to help students with special needs succeed in inclusive educational environments.
