People with ideas are dreamers. People who get things done are doers. One doer is worth eight dreamers. There are three kinds of people who make up an innovator. There are inventors (people who have new and unique ideas), problem solvers (people who have ideas about how to correct a previous error) and entrepreneurs (people who transform ideas into realities). Put them altogether they spell "innovator." Most innovative books today focus on ways to create new and unique ideas; some of them also address problem-solving, but this is less than 10% of the methodologies that the innovator needs to master. The approaches used in this book transform an idea into reality, or to put it another way, deliver innovative products to make a profit for the organization and instill pride in its employees. This means that every step in the process needs to have innovation applied to it in order to meet the expectations and demands of today's sophisticated customer. This book is designed to help the reader and their organization complete the complex process of bringing a new product to market by presenting what is expected at each step in the cycle and providing step-by-step instructions on what to do at each specific step. In large to

mid-sized organizations this book is designed to help each individual understand how they fit into the innovative cycle and explains why they should be more creative related to the work they do and more conscious of the contributions they can make. It emphasizes the importance of every individual contributing to the organization's innovative process. The book is designed to help the organization understand its Innovation Systems Cycle. In the early part of the cycle it focuses on weeding out projects that do not have the potential to produce value-added results to the stakeholders. By using the guidelines outlined in this book, an organization can reduce its new project failure rate by as much as 50% which should result in almost doubling the organization ' s new product output thereby increasing profits by as much as 15%.

business and leadership for readers of Daniel Pink, Tom Peters, and Chip and Dan Heath. NEW YORK TIMES BESTSELLER | NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The Huffington Post • Financial Times • Success • Inc. • Library Journal Creativity, Inc. is a manual for anyone who strives for originality and the first-ever, all-access trip into the nerve center of Pixar Animation—into the meetings, postmortems, and “Braintrust” sessions where some of the most successful films in history are made. It is, at heart, a book about creativity—but it is also, as Pixar co-founder and president Ed Catmull writes, “an expression of the ideas that I believe make the best in us possible.” For nearly twenty years, Pixar has dominated the world of animation, producing such beloved films as the Toy Story trilogy, Monsters, Inc., Finding Nemo, The Incredibles, Up, WALL-E, and Inside Out, which have gone on to set box-office records and garner thirty Academy Awards. The joyousness of the storytelling, the inventive plots, the emotional authenticity: In some ways, Pixar movies are an object lesson in what creativity really is. Here, in this book, Catmull reveals the ideals and techniques that have made Pixar so widely admired—and so profitable. As a young man, Ed Catmull had a dream: to make the first computer-animated movie. He nurtured that dream as a Ph.D. student at the University of Utah, where many computer science pioneers got their start, and then forged a partnership with George Lucas that led, indirectly, to his co-founding Pixar in 1986. Nine years later, Toy Story was released, changing animation forever. The essential ingredient in that movie’s success—and in the thirteen movies that followed—was the unique environment that Catmull and his colleagues built at Pixar, based on leadership and

management philosophies that protect the creative process and defy convention, such as:

- Give a good idea to a mediocre team, and they will screw it up. But give a mediocre idea to a great team, and they will either fix it or come up with something better.
- If you don't strive to uncover what is unseen and understand its nature, you will be ill prepared to lead.
- It's not the manager's job to prevent risks. It's the manager's job to make it safe for others to take them.
- The cost of preventing errors is often far greater than the cost of fixing them.
- A company's communication structure should not mirror its organizational structure. Everybody should be able to talk to anybody.
