Madchester may have been born at the Hacienda in the summer of 1988, but the city had been in creative ferment for almost a decade prior to the rise of acid house. The end-of-the-century party is the definitive account of a generational shift in popular music and youth culture, what it meant and what it led to. First published right after the Second Summer of Love, it tells the story of the transition from new pop to the political pop of the mid-1980s and its deviant offspring, post-political pop. Resisting contemporary proclamations about the end of youth culture and the rise of a new, right-leaning conformism, the book draws on interviews with DJs, record company bosses, musicians, producers and fans to outline a clear transition in pop thinking, a move from an obsession with style, packaging and synthetic sounds to content, socially conscious lyrics and a new authenticity. This edition is framed by a prologue by Tara Brabazon, asking how we can reclaim the spirit, energy and authenticity of Madchester for a post-youth, post-pop generation. It is illustrated with iconic photographs by Kevin Cummins.

The Election of February 2011 will be remembered for the defeat and virtual annihilation of Fianna Fáil. Stripped of power in humiliating circumstances, the party was disgraced, possibly to the point of no return. The story of how this happened is a mixture of farce and tragedy. The collective

leadership of the party lost touch with reality and watched, as though mesmerised, while Brian Cowen led them from one catastrophic mistake to another. He was aided in this by Brian Lenihan, Minister for Finance, whose mistakes were among the worst ever made by the holder of this crucial office. Fianna Fáil demolished itself in the eyes of the electorate due to its entanglement with property and banking scandals, inept decisions and gross mismanagement of the most profitable time ever enjoyed by the Irish people. Two journalists with inside knowledge of the events and extensive experience of politics over many years have joined their talents to write this gripping story.

Elections ask voters to choose between political parties. But voters across the UK are increasingly being presented with fundamentally different, and largely disconnected, sets of political choices. This book is about this hollowing out of a genuinely British democratic politics: how and why it has occurred, and why it matters. Electoral choices across Britain became increasingly differentiated along national lines over much of the last half-century. In 2017, for the second general election in a row, four different parties came first in the UK's four nations. UK voters are increasingly faced with general election campaigns that are largely disconnected from each other. At the same time, voters acquire much of their information about the election from news-media based in

London that display little understanding of these national distinctions. The UK continues to elect representatives to a single parliament. But the shared debates and sets of choices that tie a political community together are increasingly absent. Separate national political arenas and agendas still have to interact but in some respects the House of Commons increasingly resembles the European Parliament – whose members are democratically chosen but from a disconnected series of separate national electoral contests. This is deeply problematic for the long-term unity and integrity of the UK.

- A 2006 survey revealed that two thirds of Americans consider themselves “dissatisfied with the way things are going in the U.S.”
- In recent polls, 60 to 80 percent of registered voters say they want an independent presidential candidate.
- Independent voters now constitute the largest segment of the American electorate. America is at a political crossroads. We are growing alienated from the two major parties, which are dominated by ideologues and offer simplistic solutions, with candidates who think only in terms of how to frame issues—often irrelevant “hot-button” issues—in order to get elected. Meanwhile, voters tend to crave real solutions to the real problems we face—energy independence, affordable health care, the environment, jobs, sustainable national security. And increasingly those voters want change and they want it now, yearning for leaders who understand the tough problems, confront them head-on, and can offer practical solutions without kowtowing to lockstep partisan interests. consultant Douglas E. Schoen now makes a bold argument: that the 2008 presidential election offers an unprecedented opportunity for the right third-party ticket. In *Declaring Independence*, Schoen discusses major trends—voter dissatisfaction, lengthening campaign seasons, networking and fund-raising on the Internet, demographic shifts, fundamental changes in how Americans view their leaders—that are opening the door to more independent candidates and radically transforming how all candidates present themselves to the electorate and citizenry. The numbers don't lie: We are a nation of political moderates who want smart, workable solutions to our serious problems. Largely as a result of media attention, the current cynical and dysfunctional political system divides us into red and blue Americas—and in turn makes government less responsive, efficient, and effective. Americans want to see results; they don't care whether those results come from Republicans or Democrats or people outside the two old-school parties. This is the first major book to study and analyze the large-scale trends and minor developments that could pave the way to a successful third-party presidential candidacy. Clearheaded, optimistic, and filled with incisive commentary from a respected authority on campaign politics, *Declaring Independence* offers a cogent glimpse at a transformed near future of American politics and government. Advance praise for *Declaring Independence* “The two-party system in America is breaking down, and Doug Schoen's new book, *Declaring Independence*, explains why. This is an in-depth look at why the American people are so fed up with partisanship, and where we, as a nation, go from here.” —Michael R. Bloomberg, mayor of New York City “It's Independents' Day in America, and Doug Schoen works the numbers in this persuasive book to prove that anxious moderates can do more than swing elections. poised to smash the two-party system and give us an independent president as early as this year.” –Jonathan Alter, senior editor, Newsweek, author of The Defining Moment
“Aptly titled, Declaring Independence is a convincing exploration by a learned observer of the forces propelling—and the urgent need for—political reform.” –Bob Kerrey, former Nebraska senator and governor, president, the New School
