Remember that if the "push" phase of the jump takes a quarter second then Superman's acceleration must be 250 m/s/s. Then we can use the following formula and plug in acceleration of 250 and time of 1/4th. distance = 1/2 acceleration * time^2. distance = 1/2 (250) (1/4)^2. distance = 125 (1/16) distance = 7.8 meters.
