As they do so, the smaller dune ascends and spreads over the larger one. During this process, however, the fluid flow, which is deflected by the new dune, strongly erodes the front of the dune, which ejects a new dune. Because it is smaller and emerges downstream, the new dune moves faster and a gap opens up between the two dunes," Franklin said.

Get excited for the 2021 Denis Villeneuve *Dune* film release, starring Timothée Chalamet, with *The Science of Dune*! Since its original publication in 1965, the Dune series has entranced generations of readers with its complex plotting, fascinating characters, grand scope, and incredible scientific predictions. This guide offers fascinating scientific speculation on topics including quantum physics, biochemistry, ecology, evolution, psychology, technology, and genetics. It scrutinizes Frank Herbert's science fiction world by asking questions such as: • Is the ecology of Dune realistic? • Is it theoretically possible to get information from the future? • Could humans really evolve as Herbert suggests? • Which of Herbert's inventions have already come to life? This companion is a must-have for any fan who wants to revisit the world of Dune and explore it even further.

Follows the adventures of Paul Atreides, the son of a betrayed duke given up for dead on a treacherous desert planet and adopted by its fierce, nomadic people, who help him unravel his most unexpected destiny.

A compendium of Herbert's essays, articles, observations, reminiscences and meditations, as well as a never-before-published interview with the late writer

Frank Herbert's *Dune* is the biggest-selling science fiction story of all time; the original book and its numerous sequels have transported millions of readers into the alternate reality of the Diverse. *Dune and Philosophy* raises intriguing questions about the Diverse in ways that will be instantly meaningful to fans. Those well-known characters--Paul Atreides, Baron Harkonnen, Duncan Idaho, Stilgar, the Bene Gesserit witches--come alive again in this fearless philosophical probing of some of life's most basic questions. *Dune* presents us with a vast world in which fanaticism is merciless and history is made by the interplay of ruthless conspiracies. Computers have long been outlawed, so that the abilities of human beings are developed to an almost supernatural level. The intergalactic empire controlled by a privileged aristocracy raises all the old questions of human interaction in a strange yet weirdly familiar setting. Do secret conspiracies direct the future course of human political evolution? Can manipulation of the gene pool create a godlike individual? Are strife and bloodshed essential to progress? Can we know so much about the future that we lose the power to make a difference? Does reliance on valuable resources--such as "spice," oil, and water--place us at the mercy of those who can destroy those resources? When gholas are reconstructed from the cells of dead people and given those people's memories, is the gholas the dead person resurrected? Can the exploitation of religion for political ends be reduced to a technique? Philosophers who are fans of *Dune* will trek through the desert of the Diverse seeing answers to these and other questions.

This companion to Frank Herbert's six original *Dune* novels--*Dune*, *Dune Messiah*, *Children of Dune*, *God Emperor of Dune*, *Heretics of Dune* and *Chapterhouse: Dune*--provides an encyclopedia of characters, locations, terms and other elements, and highlights the series' underrated aesthetic integrity. An extensive introduction discusses the theme of ecology, chaos theory concepts and structures, and Joseph Campbell's monomyth in Herbert's narratives.

Bronwen Wallace Memorial Award-winning poet Sonnet L'Abbé returns with her third collection, in which a mixed-race woman decomposes her inheritance of Shakespeare by breaking open the sonnet and inventing an entirely new poetic form. DOROTHY LIVESAY POETRY PRIZE FINALIST RAYMOND SOUSTER AWARD FINALIST How can poetry grapple with how some cultures assume the place of others? How can English-speaking writers use the English language to challenge the legacy of colonial literary values? In Sonnet's Shakespeare, one young, half-dougl (mixed South Asian and Black) poet tries to use "the master's tools" on the Bard's "house," attempting to dismantle his monumental place in her psyche and in the poetic canon. In a defiant act of literary patricide and a feat of painstaking poetic labour, Sonnet L'Abbé works with the pages of Shakespeare's sonnets as a space she will inhabit, as a place of power she will occupy. Letter by letter, she sits her own language down into the white spaces of Shakespeare's poems, until she overwhelms the original text and effectively erases Shakespeare's voice by subsuming his words into hers. In each of the 154 dense new poems of Sonnet's Shakespeare sits one "agrocultured" Shakespearean sonnet--displaced, spoken over, but never entirely silenced. L'Abbé invented the process of Sonnet's Shakespeare to find a way to sing from a body that knows both oppression and privilege. She uses the procedural techniques of Oulipian constraint and erasure poetics to harness the raw energies of her hyperconfessional, trauma-forged lyric voice. This is an artist's magnum opus and mixed-race girlboy's diary; the voice of a settler on stolen Indigenous territories, a sexual assault survivor, a lover of Sylvia Plath and Public Enemy. Touching on such themes as gender identity, pop music, nationhood, video games, and the search for interracial love, this book is a poetic achievement of undeniable scope and significance.

The desert planet has begun to grow green and lush. The life-giving spice is abundant. The nine-year-old royal twins, possessing their father's supernatural powers, are being groomed as Messiahs. But there are those who think the Imperium does not need Messiahs ...

A biography of the science fiction writer, presented by his son, describes Herbert's childhood in Tacoma, Washington, his early years as a reporter and editor, his military service, and his struggles to become published.
