Le piante sono esseri intelligenti? Partendo da questa semplice domanda Stefano Mancuso e Alessandra Viola conducono il lettore in un inconsueto e affascinante viaggio intorno al mondo vegetale. In generale, le piante potrebbero benissimo vivere senza di noi. Noi invece senza di loro ci estingueremmo in breve tempo. Eppure persino nella nostra lingua, e in quasi tutte le altre, espressioni come "vegetare" o "essere un vegetale" sono passate a indicare condizioni di vita ridotte ai minimi termini. "Vegetale a chi?"... Se le piante potessero parlare, forse sarebbe questa una delle prime domande che ci farebbero.

Le piante sono esseri intelligenti? Partendo da questa semplice domanda Stefano Mancuso e Alessandra Viola conducono il lettore in un inconsueto e affascinante viaggio intorno al mondo vegetale. In generale, le piante potrebbero benissimo vivere senza di noi. Noi invece senza di loro ci estingueremmo in breve tempo. Eppure persino nella nostra lingua, e in quasi tutte le altre, espressioni come "vegetare" o "essere un vegetale" sono passate a indicare condizioni di vita ridotte ai minimi termini. "Vegetale a chi?"... Se le piante potessero parlare, forse sarebbe questa una delle prime domande che ci farebbero.

“ Fascinating...full of optimism...this quick, accessible read will appeal to anyone with interest in how plants continue to surprise us. ” —Library Journal Do plants have intelligence? Do they have memory? Are they better problem solvers than people? The Revolutionary Genius of Plants—a fascinating, paradigm-shifting work that upends everything you thought you knew about plants—makes a compelling scientific case that these and other astonishing ideas are all true. Plants make up eighty percent of the weight of all living things on earth, and yet it is easy to forget that these innocuous, beautiful organisms are responsible for not only the air that lets us survive, but for many of our modern comforts: our medicine, food supply, even our fossil fuels. On the forefront of uncovering the essential truths about plants, world-renowned scientist Stefano Mancuso reveals the surprisingly sophisticated ability of plants to innovate, to remember, and to learn, offering us creative solutions to the most vexing technological and ecological problems that face us today. Despite not having brains or central nervous systems, plants perceive their surroundings with an even greater sensitivity than animals. They efficiently explore and react promptly to potentially damaging external events thanks to their cooperative, shared systems; without any central command centers, they are able to remember prior catastrophic events and to actively adapt to new ones. Every page of The Revolutionary Genius of Plants bubbles over with Stefano Mancuso ’ s infectious love for plants and for the eye-opening research that makes it more and more clear how remarkable our fellow inhabitants on this planet really are. In his hands, complicated science is wonderfully accessible, and he has loaded the book with gorgeous photographs that make for an unforgettable reading experience. The Revolutionary Genius of Plants opens the doors to a new understanding of life on earth.

From the New York Times bestseller Brenda Novak comes the next installment of Dr. Evelyn Talbot and her murderous home for psychopaths in *Hello Again. SHE CAN MAKE SENSE OF A COMPLEX CRIMINAL MIND*. Evelyn Talbot, a psychiatrist at a maximum-security prison in Alaska, studies some of the world's worst serial killers. But she 's about to meet her most elusive patient at Hanover House yet: Dr. Lyman Bishop, AKA the Zombie Maker given his fondness for performing ice-pick lobotomies on his victims. A brilliant cancer researcher, Bishop is either the most cunning psychopath Evelyn has ever encountered—or he is wrongly convicted. *WHAT HAPPENS WHEN A CRIMINAL CAN SEE INTO HER OWN?* When a new ice-pick fatality occurs, it seems Bishop really was wrongly convicted. Except...Evelyn has a personal connection to the victim and that suggests the killer may be someone from her own past: Jasper Moore, her high school boyfriend who tortured her and left her for dead when she was only sixteen. Jasper also murdered three of her friends—and was never caught. Is he trying to send a message with this copycat crime? The only thing Evelyn knows for sure is that if Jasper is on her trail, she might not be able to escape again . . .

Weeds survive, entombed in the soil, for centuries. They are as persistent and pervasive as myths. They ride out ice ages, agricultural revolutions, global wars. They mark the tracks of human movements across continents as indelibly as languages. Yet to humans they are the scourge of our gardens, saboteurs of our best-laid plans. They rob crops of nourishment, ruin the exquisite visions of garden designers, and make unpleasant and impenetrable hiding places for urban ne'er-do-wells. Weeds can be destructive and troubling, but they can also be beautiful, and they are the prototypes of most of the plants that keep us alive. Humans have grappled with their paradox for thousands of years, and with characteristic verve and lyricism, Richard Mabey uncovers some of the deeper cultural reasons behind the attitudes we have to such a huge section of the plant world.

*Her Darkest Nightmare*, first in an electrifying new series from New York Times bestselling author Brenda Novak *THE HUNT FOR A SERIAL KILLER* Evelyn Talbot knows that a psychopath can look perfectly normal. She was only sixteen when her own boyfriend Jasper imprisoned and tortured her—and left her for dead. Now an eminent psychiatrist who specializes in the criminal mind, Evelyn is the force behind Hanover House, a maximum-security facility located in a small Alaskan town. Her job puts her at odds with Sergeant Amarok, who is convinced that Hanover is a threat to his community...even as his attraction to beautiful Evelyn threatens to tear his world apart. *BEGINS WITH AN ESCAPE FROM HER PAST* Then, just as the bitter Alaskan winter cuts both town and prison off from the outside world, the mutilated body of a local woman turns up. For Amarok, this is the final proof he needs: Hanover has to go. Evelyn, though, has reason to fear that the crime is a personal message to her—the first sign that the killer who haunts her dreams has found her again. . .and that the life she has so carefully rebuilt will never be the same... “ Brenda Novak's seamless plotting, emotional intensity, and true-to-life characters...make her books completely satisfying. ” —New York Times bestselling author Allison Brennan

More than twenty years ago, when Italian Carlo Petrini learned that McDonald's wanted to erect its golden arches next to the Spanish Steps in Rome, he developed an impassioned response: he helped found the Slow Food movement. Since then, Slow Food has become a worldwide phenomenon, inspiring the likes of Alice Waters and Michael Pollan. Now, it's time to take the work of changing the way people grow, distribute, and consume food to a new level. In *Terra Madre*, Petrini shows us a solution in the thousands of newly formed local

alliances between food producers and food consumers. And he proposes expanding these alliances-connecting regional food communities around the world to promote good, clean, and fair food. The end goal is a world in which communities are entitled to food sovereignty-allowed to choose not only what they want to grow and eat, but also how they produce and distribute it.
