Dishwasher Lights Stay On - Ready To DIY

The water inlet valve is what lets the water into your dishwasher. The water line is hooked to it and a solenoid activates to let the water into the dishwasher. The dishwasher may not fill with water if the water valve filter screen is blocked by debris. Get access to the water inlet valve and cleaning it thoroughly.

Dishwasher Will Not Fill With Water During ... - DIY Projects

On many dishwashers, the latch engages a switch to activate the timer and other control components. If the latch is not completely engaged or if the switch is faulty, the machine will not operate. Here's how to test and repair a door switch:
Step 1: Latch the door and hold the latch tightly in the closed position.
