Part of Pluto's 21st birthday series Get Political, which brings essential political writing in a range of fields to a new audience.'One of the most revered figures in world theatre ... the liberation theologian of theatre.' Guardian'Should be read by everyone in the world of theatre who has any pretensions at all to political commitment.' John Arden'So remarkable, so original and so ground-breaking that I have no hesitation in describing the book as the most important theoretical work on the theatre in modern times.' George Wellwarth'Theatre is a weapon. ... A weapon for liberation."This new edition of Theatre of the Oppressed brings a classic work on radical drama fully up to date and includes a new foreword by the author Augusto Boal. Boal restores theatre to its proper place as a popular form of communication and expression. He demonstrates the ways in which theatre has come to reflect ruling-class control, drawing on the theories of Aristotle and Machiavelli. He then shows the process reversed in Brechtian/Marxist poetics to the revolutionary potential of transforming the spectator into the actor. Throughout, Boal draws on his own experience in Latin America and illustrates his theory with practical examples.

Each exercise includes many photographs, traditional topics, and experiments that help students learn about life. Procedures within each exercise are numerous and discrete so that an exercise can be tailored to the needs of the students, the style of the instructor, and the facilities available.

The first step-by-step guidebook for successful innovation planning Unlike other books on the subject, 101 Design Methods approaches the practice of creating new products, services, and customer experiences as a science, rather than an art, providing a practical set of collaborative tools and methods for planning and defining successful new offerings. Strategists, managers, designers, and researchers who undertake the challenge of innovation, despite a lack of established procedures and a high risk of failure, will find this an invaluable resource. Novices can learn from it; managers can plan with it; and practitioners of innovation can improve the quality of their work by referring to it.

Simplified Signs presents a system of manual sign communication intended for special populations who have had limited success mastering spoken or full sign languages. It is the culmination of over twenty years of research and development by the authors. The Simplified Sign System has been developed and tested for ease of sign comprehension, memorization, and formation by limiting the complexity of the motor skills required to form each sign, and by ensuring that each sign visually resembles the meaning it conveys. Volume 1 outlines the research underpinning and informing the project, and places the Simplified Sign System in a wider context of sign usage, historically and by different populations. Volume 2 presents the lexicon of signs, totalling approximately 1000 signs, each with a clear illustration and a written description of how the sign is formed, as well as a memory aid that connects the sign visually to the meaning that it conveys. While the Simplified Sign System originally was developed to meet the needs of persons with intellectual disabilities, cerebral palsy, autism, or aphasia, it may also assist the communication needs of a wider audience – such as healthcare professionals, aid workers, military personnel , travellers or parents, and children who have not yet mastered spoken language. The system also has been shown to enhance learning for individuals studying a foreign language. Lucid and comprehensive, this work constitutes a valuable resource that will enhance the communicative interactions of many different people, and will be of great interest to researchers and educators alike.
